

GemURL Launches Free, Easy-to-Use URL Shortener with Custom Links, Click Tracking, and Safety Tools

The new link management platform offers unlimited free short links, custom aliases, domain selection, real-time analytics, and a URL unshortening feature — no login required.

GemURL Launches

Free, Easy-to-Use URL Shortener with Custom Links, Click Tracking, and Safety Tools

Guwahati, Assam May 25, 2025 ([IssueWire.com](https://www.issuewire.com)) - A new tool in the digital space, **GemURL** (<https://gemurl.com>), is simplifying the way people share, track, and manage links online. Built with a focus on ease, speed, and accessibility, GemURL offers a **free, unlimited URL shortener** packed with smart features — all designed for modern users.

With just one click, anyone can shorten long links into clean, professional-looking URLs. Users can also customize the link ending (alias), choose from a selection of short domains provided by GemURL, and even track how many clicks their link receives — all without needing to register or log in.

“Our goal with GemURL is to make link sharing not only faster and simpler but smarter,” said the company spokesperson. “We wanted to build a tool that anyone — from students to startups — can use freely, with zero barriers.”

Key Features of GemURL:

- **Easy & Simple URL Shortening** – Paste any long URL and shorten it instantly

- **Custom Short URLs** – Add your own alias (e.g., gemurl.com/offer) for branding
- **Custom Domains** – Select from domains provided by GemURL (no domain setup needed)
- **Click Tracking** – Real-time link analytics with no login required
- **URL Unshortener Tool** – Preview where a short link leads before you click
- **Report Malicious Links** – Flag unsafe or suspicious links for removal
- **Free and Unlimited** – Use as often as you like, with no usage limits or cost

GemURL also supports unshortening of links created on other platforms, helping users stay safe and informed before clicking unknown URLs.

Designed for content creators, businesses, digital marketers, educators, and everyday users alike, GemURL is optimized for both mobile and desktop — providing a lightweight, no-hassle experience.
