

HealthOrbit AI Debuts MedOrbit—Ambient Scribe & AI Co-Pilot That Finishes Notes in 30 Seconds

Multilingual, EHR-ready platform cuts charting time by up to 70 percent and surfaces clinical insights on the spot.

Austin, Texas May 29, 2025 ([Issuewire.com](https://www.issuewire.com)) - HealthOrbit AI releases MedOrbit, an ambient medical-scribe and clinical-intelligence suite that transforms live clinician-patient conversations into structured documentation, referral letters and care instructions in under 30 seconds. The cloud-based launch adds 24-language translation, real-time decision support, and direct export to major electronic health-record (EHR) systems.

“Documentation overload is draining the profession,” said **Rakesh Kaipenchery, co-founder and chief executive officer**. “MedOrbit clears the clerical backlog so clinicians can devote their time—and their empathy—to patients.”

Co-founder and chief revenue officer Jobin Jose underscored the financial upside: “Missed codes and partial notes cost practices thousands each month. MedOrbit captures every symptom, code, and charge detail as it happens, boosting revenue while easing burnout.”

HealthOrbit AI at a Glance -

AI Scribing & Documentation

Hands-free voice capture with instant structuring into SOAP, CHAPS, SBAR or custom templates.

Multilingual Engine (24+ languages)

Live translation of dialogue and documents—ideal for diverse patient populations.

Clinical Intelligence Co-Pilot

Prompts on drug interactions, follow-up questions, and ICD-10/CPT suggestions during the visit.

Adaptive Learning NLP

Models refine accuracy from user corrections and specialty-specific vocabulary.

Seamless EHR Integration

One-click push of ready-to-sign notes into existing workflows—no re-keying.

HIPAA-Grade Security

Enterprise encryption and full compliance for protected health information.

Early pilots report up to **70 percent time savings per encounter** and a significant reduction in missed billing opportunities.

Availability

MedOrbit is available now in the United Kingdom, the United States, and other supported regions. Clinicians can book a demo or start a [free trial at HealthOrbit AI](#)

About HealthOrbit AI

HealthOrbit AI builds ambient, clinician-centric [medical AI scribe](#) software that streamlines documentation and administration. Its product family—including MedOrbit (ambient scribe), RevOrbit (coding automation), and CareOrbit (follow-up management)—is co-designed with frontline clinicians to restore time, accuracy, and compassion to healthcare.
