

Imagen Network (IMAGE) Introduces Secure AI Filters for Transparent Community Curation

AI-powered tools offer users new control over content visibility and moderation.

Seattle, Washington May 4, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Imagen Network](#) has launched a new layer of AI-enhanced filter tools aimed at improving social curation and content engagement across its decentralized platform. These updates reflect the platform's goal of enhancing user-driven moderation and visibility.

The filters allow users to personalize content preferences while promoting transparency and trust. Unlike traditional moderation systems, Imagen's AI logic ensures curated experiences without compromising decentralization or user autonomy.

This rollout enhances feed control, protects community spaces from unwanted content, and empowers users to manage how they interact within the platform's expanding multichain ecosystem.

Imagen Network continues to innovate around user governance and AI utility, strengthening its position as the go-to decentralized social hub for the next generation of online communities.

About Imagen Network

Imagen Network is the world's first decentralized social networking platform powered entirely by AI. It enables secure, personalized, and intelligent social experiences for Web3 users through advanced content tools and blockchain-backed ownership.
