

Lexa Chat by Robi Labs Enters Preview Phase with Multimodal AI and No Usage Limits

Open-access AI platform allows unlimited text and image-based conversations in multiple languages.

Yerevan, Armenia May 3, 2025 ([Issuewire.com](https://www.issuewire.com)) - Robi Labs, an independent AI research company, today announced the launch of the experimental preview of Lexa Chat, a new multimodal conversational AI platform now available to the public with unlimited free access. Users can sign up and begin engaging in text and image-based conversations in multiple languages at <https://chat.robilai.com>.

Lexa Chat represents a major leap in accessible AI interaction, offering real-time communication with Robi Labs' advanced language and vision models. Users can upload images, generate structured outputs, and collaborate through shareable chat sessions—all without usage restrictions.

“Lexa is the interface to our AI research. It’s fast, intuitive, and open by design,” said Alen Hovhannisyan, Founder and CEO of Robi Labs. “By opening Lexa Chat to the public with no restrictions, we’re inviting people to explore, create, and help shape the future of our models in real-world contexts.”

Key Features of Lexa Chat:

- Unlimited Access – No quotas or hidden limits.
- Multimodal Interaction – Understands and responds to both text and image inputs.
- Multilingual Support – Seamless conversation across multiple languages.
- Artifacts – Save and reuse outputs like summaries, data, or creative content.
- Shareable Sessions – One-click links to share entire conversations.

- Coming Soon: Picasoe – Integration with Robi Labs’ proprietary image generation model.

Lexa Chat reflects Robi Labs’ broader mission to democratize AI tools and infrastructure. Unlike closed systems, Lexa is built to evolve in public, gathering feedback, stress-testing performance, and improving through community interaction.

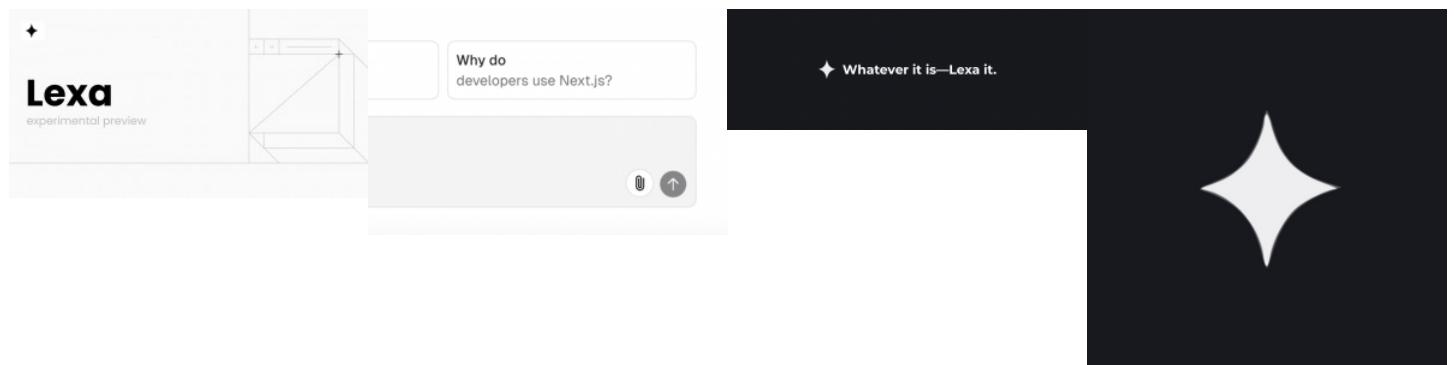

Availability:

Lexa Chat is free and live now at <https://chat.robiai.com>. Anyone with an email address can join the preview.

About Robi Labs:

Based in Yerevan, Armenia, Robi Labs is an independent AI research and infrastructure company developing state-of-the-art language, vision, and multimodal systems. Founded in 2025, its mission is to build transparent, useful, and human-aligned AI for global use.
