

MOrtner Labs Announces AI Innovators Summer Camp for Young Students

Registration open until June 1, 2025

Englewood, Florida May 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - MOrtner Labs is excited to announce its AI Innovators Summer Camp, a unique educational experience designed for students aged 11-15. The camp will take place from June 9-13, 2025, at the Englewood YMCA in Englewood, FL, running from 10:30 AM to 12:30 PM daily. No prior coding or AI experience is required.

"We believe this camp will spark a passion for technology in young minds that goes beyond passive consumption, such as doom scrolling," says Arin Ortner, President of MOrtner Labs. "Participants will not only learn about AI but also develop valuable skills that will serve them well in the future," Ortner said. MOrtner Labs has been operating programs like Coding Club and AI Innovators in Sarasota and Charlotte counties for just over a year. Ortner said, "The most exciting thing is to see the interactions between the young participants. Their presentation skills are improving and these activities provide kids an opportunity to flex their social skills."

This engaging program will introduce students to the world of Artificial Intelligence through hands-on

activities. Participants will have the opportunity to train their own language model, explore real-world AI tools and applications, and build critical thinking and problem-solving skills in a fun and supportive environment.

Program Director Kate Hutchinson said that spots still remain for kids to enroll in AI Innovators. The camp includes a \$55 materials fee, and need-based scholarships are available to ensure access for all students. Registration is open until June 1st at <https://tinyurl.com/yc4x7b44>.

The mission of MOrtner Labs is to bridge gaps in digital literacy, foster innovation and creativity, and cultivate future leaders in science, technology, engineering, art, and mathematics for a brighter tomorrow. In addition to Coding Club and AI Innovators, the Englewood-based organization also conducts research in various fields, including computer science, physics, and artificial intelligence.
