

OEMminer Releases IceRiver Miner AE1 Lite: Low-Cost Miner for Aleo – First Release

Gig Harbor, Washington Jun 11, 2025 ([IssueWire.com](https://www.issuewire.com)) - OEMminer, a reliable source for professional crypto mining hardware, has officially launched the IceRiver Miner AE1 Lite, a new, low-cost miner designed for the Aleo blockchain. This product marks the first release of the AE1 Lite model and is now available for purchase through the OEMMINER website.

Accessible Mining for Aleo

The IceRiver Miner AE1 Lite is an entry-level machine specifically created to support mining on the Aleo network. With a streamlined design and competitive price point, it provides an ideal starting point for individuals and businesses seeking to mine Aleo without a substantial initial investment.

OEMminer lists the AE1 Lite as a first release, giving early adopters the opportunity to integrate this model into their setup. It supports the KHeavyHash algorithm and is designed for efficient performance within the Aleo ecosystem.

Designed for Convenience and Compatibility

The AE1 Lite model supports an input voltage range of 110–240V, making it compatible with a variety of power setups. It includes a PSU (power supply unit) as part of the package, adding further convenience for users seeking a ready-to-use solution.

This release is aimed at those who appreciate a cost-effective mining machine that still fulfills essential operational requirements. The unit is also backed by OEMminer's reputation for quality hardware, clear product listings, and customer-oriented service.

Now Available at OEMminer

The [IceRiver Miner](#) AE1 Lite can now be ordered directly through OEMminer's online store. As with all products offered by OEMminer, the AE1 Lite is accompanied by detailed specifications and images to ensure transparency and ease of purchase.

OEMminer continues to serve the mining community with a wide range of mining hardware tailored to various blockchain platforms, including the latest developments like the Aleo network. With the launch of this first-release model, OEMminer reinforces its commitment to providing reliable mining solutions at competitive prices.
