OnGeo Intelligence

OnGeo Intelligence simplifies access to satellite imagery through its user-friendly platform. Users select a location and time range, and the system retrieves cloud-free images from a vast archive. The service uses AI to enhance 10-meter resolution images to 2.5 meters, offering clear visuals. No registration or subscriptions are required, making it accessible to all. Reports are delivered as PDFs via email, ideal for property, legal, or environmental analysis.

Key Features of Satellite Imagery Service

The service offers global coverage, AI-enhanced imagery, and mobile-friendly access. Free reports include 10-meter resolution images, with paid options up to 0.3 meters. No account setup or contracts are needed, ensuring flexibility.

How to Download a Satellite Imagery Report

- Visit OnGeo Intelligence and navigate to the order form - ongeo-intelligence.com
- Choose your area of interest on an interactive map and specify the desired time period.
- Browse available cloud-free images, select your scenes.
- Enter the code **ongeo100** during the request process.

Low-resolution satellite imagery is delivered in minutes, while high-resolution options take up to 48 hours. The process is intuitive, requiring no technical expertise.

Report Content Includes

Each report features a:

- chronological series of satellite images in natural colors (RGB), enhanced for clarity
- The PDF format ensures easy viewing on any device, with clear, actionable insights

Potential Applications Demonstrated by Users:

- Documenting land use changes for legal or planning purposes.
- Project documentation in construction and research.
- Property assessment and monitoring.
- Agricultural analysis and planning support.
