

P & M Creations Expands Nationwide to Make Architectural Services Easier and More Effective

Gurgaon, Haryana May 27, 2025 ([Issuewire.com](https://www.issuewire.com)) - In a move set to redefine the architectural landscape in India, [P & M Creations](https://www.pandmcreations.com), a leading architectural and design firm headquartered in Delhi, has officially announced its **nationwide expansion**, bringing its innovative, customer-centric services to clients across the country. This strategic expansion reflects the company's vision to democratize access to high-quality architectural and design services while simplifying the process for homeowners, developers, and institutions.

From Tier-1 metros to emerging Tier-2 and Tier-3 cities, P & M Creations is now fully operational in over **30 cities**, including Mumbai, Bengaluru, Hyderabad, Pune, Ahmedabad, Jaipur, Lucknow, Kochi, and Bhubaneswar. This expansion is a major leap forward in the firm's mission to make design and construction more **inclusive, accessible, and effective** for a wide range of clients.

Breaking Barriers in Architecture

In a country as diverse and complex as India, architectural needs vary dramatically between regions. Recognizing this, P & M Creations has spent the past year developing **region-specific design solutions**, training local teams, and building a digital platform that enables remote consultations, real-

time updates, and transparent project management.

"Architecture in India has often been seen as a luxury service accessible only to the elite. We want to break that perception," said **Pranav Mehra**, Co-founder and Design Director at P & M Creations. "Whether you are building a 2BHK house in a village in Odisha or designing a commercial plaza in Mumbai, we want to offer **affordable, high-quality, and personalized services** to every client."

Technology-Driven Design Solutions

The cornerstone of P & M Creations' expansion strategy lies in its use of **cutting-edge technology** to eliminate inefficiencies and bridge the client-service gap. With the launch of its **integrated digital design platform**, clients can now:

- Browse 3D design templates for homes, offices, retail spaces, and more.
- Schedule live consultations with architects and designers.
- Monitor design progress and revisions in real time.
- Access budgeting tools and cost estimators.
- Receive automated building plan approvals support in select cities.

The platform also supports **vernacular architecture styles**, ensuring that the design sensibilities resonate with local cultures, climate considerations, and material availability.

Pan-India Local Teams, Centralized Quality

To ensure that local clients receive personalized service without compromising quality, P & M Creations has built a **hub-and-spoke model**. Each region has trained on-ground professionals — architects, civil engineers, site supervisors, and Vastu consultants — while the design and technical quality control remain centralized.

"Our hybrid model means you'll get the **best of both worlds** — the responsiveness of a local team and the quality assurance of a top-tier national firm," said **Meena Kapoor**, Head of Regional Operations. "This also helps us offer **cost-effective** and **faster** design-to-delivery timelines."

Addressing India's Construction Challenges

India's architecture and construction industry is often marred by delays, inconsistent service standards, and lack of client education. P & M Creations is actively addressing these pain points through:

- **Standardized pricing packages** for common services.
- **Pre-verified contractor networks** to ensure ethical construction.
- **Educational webinars and design workshops** for first-time home builders.
- **Vastu-compliant design offerings**, which remain in high demand across many Indian states.

The company's transparent approach and well-defined processes have already led to over **3,000 successful project completions** in just four years of operation.

Affordable Services with Premium Touch

In a country where cost is a key determinant of service adoption, P & M Creations is determined to offer **affordable design services** without compromising on creativity or quality. Its packages start as low as ₹10,000 for basic floor plans and go up to ₹5 lakh for full-scale residential and commercial design services, including interiors and execution support.

Special offers for **government housing schemes, NGOs, and start-up co-working spaces** are also available, aligning the firm's mission with India's broader socio-economic development goals.

Sustainable and Future-Ready

As sustainability becomes central to urban planning and design, P & M Creations is investing in **eco-conscious architecture**. The firm now offers services such as:

- Passive solar design and natural ventilation planning.
- Rainwater harvesting and green roofing consultations.
- Low-carbon material selection guidance.
- Energy-efficient lighting and appliance layouts.

This focus on green design ensures that buildings are not just aesthetically pleasing, but also future-ready and environmentally responsible.

Voices from the Ground

Clients across the country have praised the company's customer service, ease of access, and professional integrity. **Ritika Sharma**, a homeowner in Jaipur, said, "Working with P & M Creations was seamless. From design to government approvals and even contractor help — they handled everything. I never imagined an architecture firm could make building my house so stress-free."

In Kochi, **Abdul Rahman**, a boutique hotel developer, said, "They blended Kerala's traditional aesthetics with modern design and delivered our project ahead of schedule. Their tech platform kept us in the loop throughout."

Looking Ahead

As India's urban and semi-urban landscape continues to evolve, the demand for intelligent, localized, and affordable architectural services is only expected to grow. P & M Creations is poised to lead this transformation by scaling its operations further into rural areas, launching its mobile design app, and partnering with local panchayats and city councils to support smarter planning at the grassroots level.

"Our vision is to be **India's most trusted design partner** for every dream home, shop, or institution.

We're here not just to design buildings — we're here to shape futures,” concluded Pranav Mehra.

About P & M Creations

Founded in 2021, **P & M Creations** is an India-based architectural and design firm offering comprehensive services in architecture, interior design, construction planning, and consultancy. Known for its innovative and technology-integrated approach, the company serves a wide spectrum of clients, from homeowners to institutional developers. With a reputation for creativity, transparency, and efficiency, P & M Creations continues to push the boundaries of what architectural services can achieve in India.
