

PaladinAI Brings Tailored AI Defense Tools to Governments and Enterprises

Empowering Nations and Enterprises with Next-Gen AI Defense Solutions Built for the Age of Intelligent Threats

Chandigarh, India Jun 27, 2025 ([IssueWire.com](https://www.issuewire.com)) - PaladinAI, the startup founded by cybersecurity expert Somesh Sawhney, is redefining how governments and enterprises combat AI-driven threats through its AI-powered and big data-driven decision intelligence platform. With its official launch in September 2024 and headquarters in Chandigarh, India, PaladinAI is already making waves across

global and emerging markets.

At the heart of PaladinAI's offering is a powerful idea: security and intelligence solutions must be custom-built for real-world use cases, not just sold as generic platforms. From criminal profiling and digital evidence collection for law enforcement, to fraud detection and operational insights for large enterprises, PaladinAI delivers highly tailored tools that strike the right nerve across multiple industries.

"India is not just a market with scope and opportunity, India is becoming the central hub for the innovation of the world," says Somesh Sawhney, Founder & CEO of PaladinAI. "I feel fortunate to be from India, and having lived in Dubai for the past 15 years, I bring a unique perspective, understanding the vastness of the Indian market and the rapid transformation ethos of Dubai."

Now, PaladinAI is building a comprehensive suite of intelligence, security, and data solutions, a fully scalable, modular ecosystem designed to cater to large-scale, custom demands across sectors such as banking, telecom, national defense, logistics, healthcare, and critical infrastructure. This upcoming suite aims to be a one-stop intelligence engine for decision-makers in the age of AI disruption.

Sawhney, with over 15 years of global experience across META, SE Asia, and EMEA, has led cross-functional teams in cybersecurity, forensic tech, and enterprise solutions. His latest venture is the culmination of that journey, PaladinAI is not a one-size-fits-all solution, but a platform that adapts to its user.

Whether it's aiding law enforcement with criminal profiling and evidence synthesis, helping governments build fraud detection models, or enabling enterprises to make intelligent decisions from terabytes of data, PaladinAI hits the nerve where insight meets action.

The company's strategy includes aggressive expansion through global channel partnerships, but its launch in India is symbolic. With digital infrastructure rapidly advancing and cyber threats becoming more sophisticated, India presents not only a strategic market but also fertile ground for scalable innovation.

With the rise of AI-driven attacks, PaladinAI stands as a sentinel, intelligent, adaptable, and purpose-built for modern defense. It's not just defending data; it's shaping the future of secure intelligence.

About PaladinAI

Founded in 2024 by [Somesh Sawhney](#), PaladinAI develops cutting-edge technology to defend against AI-based attacks. The company provides advanced Information Security & Data Analytics solutions to law enforcement agencies and enterprises worldwide. Visit [Paladin website](#) for more info.
