Prime Trade Pro Launches India's First Plug-and-Play Options Trading Automation Platform for Retail Investors

Transforming the way Indian traders execute Nifty and Bank Nifty strategies with a no-code, broker-integrated solution

New Delhi, Delhi May 6, 2025 (Issuewire.com) - Prime Trade Pro has officially launched its revolutionary options trading automation platform, enabling Indian retail traders to automate their Nifty and Bank Nifty strategies directly through their broker accounts — with zero coding required.

With integrations for major brokers including **Zerodha, Fyers, and Angel One**, Prime Trade Pro empowers users to convert their TradingView charts into live trades using pre-set conditions and risk parameters. The platform also supports paper trading and AI-based trade execution for improved accuracy and speed.

“We're making algorithmic trading accessible to the average Indian trader,” said Naveen Arya, founder of Prime Trade Pro. “Our goal is to eliminate technical barriers and provide a secure, intuitive, and high-performance automation engine built specifically for the Indian derivatives market.”

Prime Trade Pro offers flexible plans starting at ₹1299/month, along with a free demo mode for new users to explore the system risk-free.

Key Features Include:

- **Brokerless Login & Secure API Flow**
- **One-Click TradingView Automation**
- **Fully Automated, Semi-Automated & Manual Modes**
- **Mobile-Optimized Dashboard for On-the-Go Trading**
- **Realtime Order Management and Trade Logs**
