

Reclaim Your Youthfulness - The Deep Plane Facelift & Advanced Facial Rejuvenation at The Esthetic Clinics®

One of the most powerful advancements in the field of facial rejuvenation is the Deep Plane Facelift - a surgical marvel that provides incredibly natural, long-lasting results.

Mumbai, Maharashtra Jun 5, 2025 ([Issuewire.com](https://www.issuewire.com)) - In a world where vitality, elegance, and confidence are increasingly prized, more and more people are seeking procedures that help them to not just look younger, but feel more aligned with their inner self. One of the most powerful advancements in the field of facial rejuvenation is the Deep Plane Facelift - a surgical marvel that provides incredibly natural and provides long-lasting results.

But at [The Esthetic Clinics](#), we don't stop at surgery. From world-class non-surgical innovations like Ultherapy to Liquid Facelifts, we offer a comprehensive menu of anti-aging solutions designed to match your lifestyle, goals, and comfort.

Deep Plane Facelift – The Gold Standard of Surgical Rejuvenation

Unlike traditional facelifts that merely stretch the skin, the [Deep Plane Facelift](#) lifts the Superficial Musculoaponeurotic System (SMAS) along with the underlying facial fat pads. This deeper anatomical release and repositioning restores your natural youthful contours without any tight or artificial appearance.

Think of it like a sculptor reshaping the structure beneath the surface - not just smoothing over flaws but rebuilding the foundation of beauty.

Why Is the Deep Plane Facelift So Powerful?

- **Addresses Midface Descent:** It lifts sagging cheeks, jowls, and smile lines in a way no other facelift technique can.
- **Natural Results:** No pulled or “wind tunnel” look. You look like yourself - only fresher, younger, and more vibrant.
- **Long-Lasting Effects:** Because it works on deeper facial structures, results typically last 10–15 years or more.
- **Restores Facial Definition:** Jawline, cheeks, and nasolabial folds are all simultaneously improved.

But Here’s the Truth: It’s Not for Every Surgeon.

The Deep Plane Facelift is one of the most complex facial surgeries in existence. It requires advanced anatomical knowledge, artistic precision, and a mastery of microsurgical techniques.

- There are only about 10 surgeons worldwide who perform this technique at an elite level.
- In Asia, Dr. Debraj Shome is among this rare circle - trained in the U.S., he is widely acknowledged as a leading global authority in Deep Plane Facial Surgery.

About: Professor Dr. Debraj Shome

- American Board-Certified in Facial Cosmetic Surgery.
- Fellow, American Academy of Cosmetic Surgery (FAACS).
- Professor of Facial Plastic Surgery, Apollo Hospitals Group.
- Founder, The Esthetic Clinics®, India.

Dr. Shome is not only India’s top-rated facial cosmetic surgeon, but also one of the only surgeons in Asia formally trained in the Deep Plane Facelift in the United States. His mastery of deep-tissue facial surgery and an artist’s eye for aesthetics makes him a global destination for anti-aging transformations.

Why Travel to India for Your Facelift?

- **World-Class Expertise at Fractional Cost:** Get the same (or better) results as Beverly Hills or Harley Street - at a much more accessible price.
- **State-of-the-Art Surgical Suites:** International sterilization standards, advanced anesthesia monitoring, and luxury recovery rooms.
- **Global Concierge Services:** Virtual consults, travel planning, post-ops follow-ups - all handled seamlessly.

Your Rejuvenation Journey, Personalized!

Not everyone is a candidate - or willing - for surgery. At The Esthetic Clinics®, we understand that. That’s why we offer a full spectrum of non-surgical facial rejuvenation options tailored to your needs.

Non-Surgical Alternatives: When Surgery Isn’t the First Choice

1. Liquid Facelift

A “liquid” facelift uses dermal fillers and neuromodulators (like Botox®) to:

- Restore lost volume in cheeks and temple.

- Smooth out deep wrinkles and fine lines.
- Lift sagging jawlines subtly.
- Rejuvenate the mid-face and under-eye area.

2. Ultherapy® – The Non-Surgical Deep Tissue Lifter

TEC is amongst the few certified providers of Ultherapy® in India - a non-invasive procedure that uses micro-

focused ultrasound to lift and tighten the skin without any cuts, needles, or downtime.

Ultherapy® is ideal for:

- Brow lifting
- Jawline tightening
- Neck firming
- Décolletage rejuvenation

3. Energy-Based Skin Tightening & Rejuvenation

We also offer:

- Radiofrequency Microneedling (RF-MN)
- HIFU (High-Intensity Focused Ultrasound)
- Thermage®
- Laser Skin Resurfacing

Ideal Candidates for Deep Plane or Non-Surgical Facelifts

If you're over the age of 40 and experiencing:

- Sagging in the cheeks or jowls.
- Loss of facial definition.
- Deep smile lines or under-eye hollows.
- A tired, aged appearance despite good energy.

...you could benefit from a customized facial rejuvenation plan - whether surgical or non-surgical.

What To Expect from a Deep Plane Facelift at TEC

- **Pre-Operative Consultation:** In-person or virtual with Dr. Shome.
- **Surgical Duration:** 3–4 hours under general anesthesia.

- **Downtime:** 2–3 weeks (for swelling and bruising to settle).
- **Final Results:** Become fully visible by 10–12 weeks.
- **Longevity:** Results can last more than a decade.

Real Transformation. No Overdone Look!

One of the greatest fears patients have is looking “plastic” or “too done.” That’s what makes the Deep Plane Facelift different. Because it lifts the deeper support structures - not just the skin - it preserves the softness and expression of your face.

When you look in the mirror post-surgery, you’ll see YOU - Restored, Not Reinvented.

The TEC Promise: Anti-Aging Is Personal. So Is Our Care.

Whether you choose a Deep Plane Facelift, Liquid Facelift, [Ultherapy](#), or a bespoke mix of treatments, The Esthetic Clinics® is committed to offering:

- Scientific precision.
- Aesthetic artistry.
- World-class patient care.
- Transparent pricing and ethical standards.

Are You Ready to Begin Your Anti-Aging Journey?

If you've been waiting for the right time, the right hands, or the right place - this is it.

Let Dr. Debraj Shome and The Esthetic Clinics® help you reclaim your reflection. Because beauty is not about perfection or youth - it’s about alignment between how you feel and how the world sees you.
