Sibia Medical Centre, B / XIX - 568A, Civil Lines, Ludhiana, 141001

Ludhiana, Punjab May 15, 2025 (Issuewire.com) - For over three decades, Sibia Medical Centre has been a beacon of hope for heart patients seeking non-surgical treatment options. Pioneering EECP therapy in India, the clinic has established itself as a trusted name in providing safe, affordable, and innovative cardiac care. Located in Ludhiana, Punjab, the centre has successfully treated thousands of patients suffering from heart conditions — without the need for surgery.

Founded in 1994 by Dr. Sukhbindar Singh Sibia, an expert in non-invasive cardiology, Sibia Medical Centre has consistently focused on patient-centered solutions that prioritize long-term health and recovery. Today, under the leadership of Dr. Sibia, Dr. Harpreet Kaur Sibia (COO), and Dr. Ilmjot Singh Sibia (VP Marketing), the centre continues to set new benchmarks in non-invasive cardiac treatment.

EECP Treatment: A Proven, Non-Invasive Option for Heart Patients

One of the centre's hallmark services is Enhanced External Counter Pulsation (EECP) therapy. EECP is a U.S. FDA-approved, non-surgical therapy that improves blood flow to the heart by encouraging the development of new small blood vessels — a process known as natural bypass. This treatment is

especially beneficial for patients with coronary artery disease (CAD), angina, and other chronic heart conditions who are looking for surgery-free solutions.

As a leader in [EECP treatment in India](#), Sibia Medical Centre provides this therapy using the latest equipment and protocols. The treatment is completely outpatient-based, painless, and does not involve any hospital stay, making it a convenient and effective alternative for many patients.

Patients from across the country and abroad travel to this [EECP therapy centre in India](#) to experience the benefits of this revolutionary treatment. The success of the therapy lies in its ability to enhance cardiac function, reduce symptoms like chest pain and shortness of breath, and improve quality of life — all without the risks associated with surgical interventions.

More Than Just EECP: A Complete Heart Care Solution

Sibia Medical Centre is not only known for its expertise in EECP therapy in Punjab but also for a wide range of non-invasive cardiac treatments. These include:

- **Artery Chelation Therapy (ACT)**
- **Extracorporeal Shockwave Myocardial Revascularisation (ESMR)**
- **2D Echocardiography**
- **Cardiovascular Cartography**
- **Comprehensive Cardiac Consultations**

These treatments address conditions such as high blood pressure, chronic fatigue, heart rhythm disorders, small vessel disease, and symptoms like light-headedness, pain in arms or shoulders, and shortness of breath.

The Trusted Heart Clinic in India

What sets Sibia Medical Centre apart as a leading heart centre in India is its commitment to holistic patient care, personalized treatment plans, and 30 years of clinical excellence. The clinic's philosophy is rooted in prevention and healing — not just treatment. With a strong emphasis on lifestyle management, early detection, and innovative care, the centre has helped countless individuals avoid surgery and regain control of their heart health.
