

## SkyHost Launches Specialized eCommerce Hosting Services: WooCommerce, PrestaShop, OpenCart & Magento

**Bucharest, Bucuresti May 29, 2025** ([IssueWire.com](https://www.issuewire.com)) - SkyHost, one of Romania's fastest-growing web hosting providers, has officially launched a powerful suite of **eCommerce hosting solutions** tailored for online store owners and developers. These include optimized hosting packages for **WooCommerce, PrestaShop, OpenCart, and Magento**—four of the most popular platforms for online commerce.

With the increasing demand for fast, reliable, and secure eCommerce infrastructure, **SkyHost** now offers **dedicated eCommerce hosting plans** to ensure maximum performance, scalability, and uptime for all types of digital stores.

#### ???? WooCommerce Hosting – Seamless WordPress Integration

SkyHost's **WooCommerce Hosting** is designed specifically for WordPress users who want to launch an online store with minimal setup and maximum performance. This hosting is built on LiteSpeed Web Server, optimized with LSCache, and integrated deeply with WordPress and WooCommerce. It ensures ultra-fast page loads and significantly improves user experience during shopping and checkout. Customers benefit from top-tier security, reliable uptime, and compatibility with all major WooCommerce plugins.

##### Highlights:

- One-click WooCommerce installation
- Optimized for high-traffic WordPress stores
- Free SSL, daily backups, and Imunify360 protection
- Automatic updates and support for popular themes & plugins

#### PrestaShop Hosting – Built for European E-Commerce

SkyHost offers a highly optimized environment for [PrestaShop Hosting](#), perfect for European SMEs and online stores. The hosting setup includes PHP accelerators, HTTP/3 support, and database tuning tailored to PrestaShop's structure. Businesses selling across borders benefit from compatibility with VAT and EU legislation plugins. All PrestaShop packages come with preinstalled store templates, ready-to-use payment modules, and multilingual setup options.

##### Highlights:

- Preinstalled PrestaShop with optimized caching
- Enhanced security and uptime monitoring
- Full compatibility with EU VAT modules
- 24/7 local-language support in Romanian and English

#### OpenCart Hosting – Lightweight and High-Performance

SkyHost's [OpenCart Hosting](#) is tailored for businesses that need a lightweight yet scalable eCommerce platform. With NVMe SSDs and built-in caching mechanisms, OpenCart sites load incredibly fast. Hosting packages come with FastPanel, CyberPanel or cPanel, giving customers freedom to choose the control panel they prefer. SkyHost also ensures regular updates, firewall protections, and a seamless installation process.

### Highlights:

- OpenCart auto-installer
- FastPanel, CyberPanel or cPanel options
- Advanced firewall and DDoS protection
- Developer-friendly configuration and PHP tuning

### Magento Hosting – Scalable and Enterprise-Grade

SkyHost's [Magento Hosting](#) is designed for enterprise-level stores with large product catalogs and complex functionality. The hosting infrastructure supports Redis, Elasticsearch, and Varnish, enabling blazing-fast performance even under high traffic. Magento servers are configured for auto-scaling and can be deployed as VPS or cloud environments with root access. With proactive monitoring and 24/7 support, your Magento site stays secure and online around the clock.

### Highlights:

- Fully optimized for Magento 2.x
- Elasticsearch, Redis & full PHP version control
- Custom VPS options with root access
- High availability architecture upon request

### Why Choose SkyHost for E-Commerce Hosting?

SkyHost combines speed, reliability, and affordability with dedicated customer support for online businesses in **Romania** and across Europe. Every hosting plan includes:

- **Free SSL Certificates**
- **Daily backups with JetBackup**
- **Imunify360 Web Application Firewall**
- **DDoS protection by Voxility**
- **Choice of control panel: cPanel, CyberPanel, FastPanel**
- **99.99% Uptime Guarantee**
- **Servers in Romania and Moldova**

## About SkyHost
