

T-INNOWARE Shines at GISEC GLOBAL 2025: AI Agents Lead the New Era of Cybersecurity Operations and Maintenance

Singapore, Singapore May 12, 2025 ([Issuewire.com](https://www.issuewire.com)) - T-INNOWARE (a subsidiary of Sinovatio in Singapore), a leading provider of AI-powered cybersecurity operations and maintenance solutions, made a remarkable appearance at GISEC Global 2025. It shows innovative **Security AI (SAI)** and **Network Packet Broker (NPB)** solutions to the whole world. With the cutting-edge AI technology and deep industry insights, T-INNOWARE became one of the key highlights at the largest cybersecurity event in the Middle East and Africa.

China's Tech Prowess Shines at GISEC: T-INNOWARE Showcases its Innovation Capability in Cybersecurity

GISEC Global 2025, the most influential event of cybersecurity in the Middle East, brought together over **25,000 professionals** from **160+ countries** and **750 top-tier security companies** worldwide. On this global stage, T-INNOWARE stood out as an outstanding representative of a Chinese cybersecurity company going global. Under the theme "**AI Agents Redefining Cybersecurity**

Operations & Maintenance", the company showcases China's technological breakthroughs in AI-powered cybersecurity operations and maintenance.

During the event, the **"Chinese exhibition groups"** drew significant attention, multiple leading cybersecurity companies in China, including T-INNOWARE, showcased innovations in **AI, big data analytics, cloud security, and other fields**. This collective display powerfully shows the rapid growth and international competitiveness of China's cybersecurity industry.

Leveraging the robust technological expertise of its parent company Sinovatio, and its localized innovation capabilities, T-INNOWARE emerged as one of the most prominent Chinese exhibitors at the event. The company's **AI-powered cybersecurity operations and maintenance solutions** not only gained high recognition from clients in the Middle East and Africa but also showcased China's advancements in cybersecurity to the global market, setting a new benchmark for "China's Intelligent Manufacturing" in international expansion.

Security AI (SAI): The "Super Commander" of Intelligent Cybersecurity Operations and Maintenance

T-INNOWARE's **SAI platform** captivated attendees as one of the most spotlighted solutions, featuring its groundbreaking "Copilot+Autopilot" dual-mode system. Its **intelligent alert noise reduction technology** reduces false positives by **90%**, and its **automated penetration testing** can continuously scan for vulnerabilities and generate repairing suggestions, which significantly improves enterprise's security efficiency. After live demonstrations a lot of clients from the **finance and healthcare sectors** expressed strong interest in collaboration.

Network Packet Broker (NPB): The Smart Traffic Management Expert

Addressing data privacy challenges in hybrid cloud environments, T-INNOWARE's **NPB series products (NIF & SA Series)** showed powerful **traffic access, intelligent filtering, and multi-modal preprocessing** capabilities. Among them, **NIF's multi-level traffic filtering** and **SA's intelligent service chaining & SSL offloading** became hot topics among network architects.

OSINT Keynote: Transforming Public Data into Actionable Intelligence Across Industries

T-INNOWARE was invited to deliver a keynote speech titled **"OSINT: Transforming Public Data into Actionable Intelligence Across Industries."** Using real-world cases in **financial risk control and government sentiment monitoring**, the presentation illustrated how AI extracts high-value intelligence from **social media, satellite imagery, and other open-source data**. The session concluded with enthusiastic audience engagement and discussions.

Huge Potential in the Middle East: T-INNOWARE Accelerates Global Expansion

With the Middle East's cybersecurity market projected to reach **\$31 billion by 2030**, GISEC has become a key platform for companies expanding in the region. During the event, T-INNOWARE engaged in in-depth discussions with **government agencies and enterprise representatives**, laying the groundwork for future market growth.

Vision for the Future: AI-Powered Cybersecurity Ecosystem

T-INNOWARE's successful showcase at GISEC 2025 not only demonstrates its technological prowess but also introduces a new concept of **"intelligent, efficient, and cost-optimized"** in security operations and maintenance to the global market. Moving forward, the company will continue to advance **AI Agents** in **threat detection, automated response and other scenarios**. The company will accelerate its expansion in the **Middle East, Africa and other markets in the globe**.

"Cybersecurity is entering the era of AI Agents—and T-INNOWARE is ready to lead this transformation," said a T-INNOWARE spokesperson.
