

The Doors of Deception by Jamille Judge

“Defeat the acts of Deception”

Boston, Massachusetts Jun 1, 2025 ([IssueWire.com](https://www.issuewire.com)) - Jamille Judge, a faith-driven Christian believer, announces the launch of her new book, "The Doors of Deception," to expose the acts of deception to strengthen and create bolder believers. "The Doors of Deception" helps Christian believers recognize how deception can creep into the lives of many by lies, selfish motives, and the lack of God's presence and involvement in their lives. This book serves as an essential tool for anyone looking to enhance their skills to navigate a world filled with misinformation by placing God first and following His lead. By equipping believers with the knowledge to identify dishonesty, the resource aims to bring transparency and integrity in all areas of life.

One key takeaway from this book is the emphasis on critical thinking and observation. By honing these skills, individuals can become more adept at recognizing when someone is not being truthful and taking advantage. This book encourages readers to approach conversations with a healthy degree of skepticism, fostering an environment where honesty and questions are prioritized.

As misinformation proliferates in today's society, the ability to discern truth from falsehood has become increasingly critical and necessary to maintain a healthy and prosperous life. "The Doors of Deception" provides practical insights into deceptive practices and communication in modern times and the importance of correct perception.

“Perception can influence your point of view. How you regard, understand, and interpret information can influence your attitude, actions, and emotions towards it. If your perspective of life and how you see people are tarnished, you can be deceived.” says Judge

Readers will learn the importance of building a relationship with God, Our Creator, who gives the wisdom to see signs of those who lie, have inconsistencies in stories, aware of changes in body language, and emotional responses that do not align with what is said. These tools can enhance interpersonal interactions, whether in personal relationships, professional settings, or public discourse.

Furthermore, the book addresses the impact of deception, mass deception, and self-deception. With the rise of social media and digital communication, the expansion of deception has evolved without resolution. The conversations around deceit have become ways to defend against it instead of ways to end the works of deception. The book exposes how misinformation spreads and highlights the importance of verifying information before accepting it as truth.

The Doors of Deception blends personal experiences, scriptural reflections, and wisdom that make this book purposeful for all. This book is also now available on Amazon, Barnes & Noble, and selected bookstores.
