

Tony Deoleo Sets His Sights on Space: The Fighting Entrepreneur Enters Talks with Blue Origin for Edge of Space Mission

California, United States May 7, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Tony Deoleo, the dynamic entrepreneur, philanthropist, bestselling author, real estate industrialist, fitness expert, and visionary leader, is reaching for the stars—literally. Known around the globe as The Fighting Entrepreneur, Deoleo is once again pushing boundaries, this time aiming for the very edge of Earth’s atmosphere.

After decades of trailblazing success across industries—from health and finance to real estate, media, and personal development—Tony is preparing for his boldest mission yet: space exploration.

He is in talks with Blue Origin, one of the world’s leading aerospace companies, to join an upcoming Edge of Space mission—an exclusive civilian voyage to the threshold between Earth and space.

“This isn’t a stunt—it’s a symbol,” says Deoleo.

“A message to every dreamer: if I can rise from nothing and reach the stars, so can you.”

This visionary leap is supported by his latest venture, Deoleo Aviation Group, a premier private and business jet service company built on precision, performance, and purpose. But for Tony, this isn’t just about the flight—it’s about the mission.

Edge of Space is designed to inspire, educate, and innovate. It represents the future of exploration, where private space travel becomes a platform for transformation and legacy.

Tony shares his message with trademark passion:

“I’m not just chasing dreams—I’m launching to the EDGE OF SPACE.

They call me The Fighting Entrepreneur because I don’t just rise—I ignite revolutions.

From transforming lives to building legacies, I’ve conquered industries—and now, I’m reaching for the stars.

This is more than a dream. It symbolizes what’s possible when ambition, innovation, and purpose align.

To every dreamer told ‘you’ll never make it’—watch me.

From bestselling author to philanthropist, from fitness expert to entrepreneur—and above all, a relentless innovator—

I’ve always built the impossible.

The edge of space is calling—

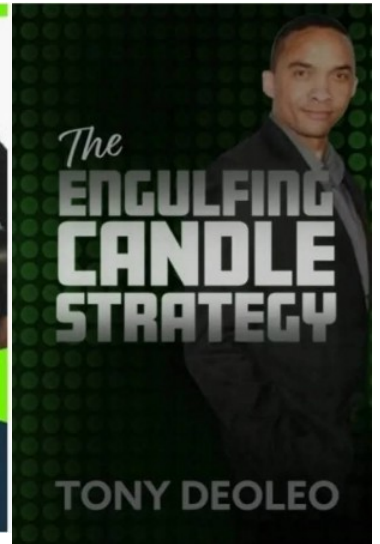

and I’m built to answer.”**
