

VERDE Earth Solutions Partners to Bring Free EV Charging Opportunities to Property Owners Nationwide

Businesses Can Now Get EV Charging Stations at No Cost Thanks to an Innovative Rollout by Supernova Energy

Dallas, Texas May 8, 2025 ([IssueWire.com](https://www.issuewire.com)) - In an effort to make electric vehicle (EV) infrastructure more accessible across the U.S., **VERDE Earth Solutions has partnered with Supernova Energy to connect businesses with NO-COST EV charging stations.** This initiative is ideal for property owners, shopping centers, churches, restaurants, warehouses, hotels, apartment communities, parks/recreation, event venues, and other commercial locations interested in offering EV charging without the high upfront costs.

EVERYTHING IS INCLUDED:

permits, equipment, installation, insurance, on-going maintenance, & all future upgrades

Unlike traditional installations, this offer requires **no out-of-pocket costs** to the property owner since Supernova Energy **retains ownership of the equipment** and shares **50% of all net revenue generated** by the charging stations with the host site. This makes it not only a sustainability win—but also a passive, yet **potentially lucrative income stream.**

"We're excited to help businesses go green without the financial risk," said Latonia Smith, CEO and Renewable Energy Consultant at VERDE Earth Solutions. "Many of our clients are surprised to learn they can benefit from EV infrastructure with zero capital investment."

There is no obligation to proceed, and no sensitive, personal, or financial details are ever required in order to qualify. All consultations are free of charge, and business owners interested in participating are asked for **very basic property information** in order to be considered. These details include: owner's name(s) | business name | property address | business type | phone number | email address.

For details or to get started, contact Latonia Smith at support@verdeearth.com or call 1-833-VERDE-03 Main | 972-885-7608 Cell, or visit our website: <https://www.verdeearth.solutions/>.
