

Vista Clara Inc. Launches Canadian Subsidiary: Vista Clara Geotech ULC

Mukilteo, Washington May 22, 2025 ([IssueWire.com](https://www.issuewire.com)) - Vista Clara Inc., a global leader in geophysical NMR technology, is pleased to announce the formation of a new Canadian subsidiary, **Vista Clara Geotech ULC**, headquartered in Nanaimo, British Columbia. The new entity will strengthen Vista Clara's presence in the Canadian market and lead international sales initiatives beyond the United States.

The subsidiary will be led by **Simon G. Proctor**, who joins as **Managing Director**. Mr. Proctor brings extensive experience in international business development and scaling technology companies in global markets.

"I'm thrilled to join a world leader in geophysical technology," said Proctor. "Vista Clara is the gold standard in NMR expertise and has earned a loyal and growing customer base worldwide. I'm excited to drive growth both in Canada and internationally through this new dedicated platform."

Dave Walsh, Founder and President of Vista Clara Inc., added: "We're delighted to welcome Simon to the Vista Clara team. His leadership and global business experience will be key to expanding our reach in Canada and beyond. Establishing a Canadian subsidiary underscores our commitment to serving clients in international markets and supporting our long-term growth strategy."

About Vista Clara Inc.

Founded in 1997, Vista Clara Inc. specializes exclusively in geophysical nuclear magnetic resonance (NMR) technology. The company designs and manufactures advanced magnetic resonance

instruments that enable direct, non-invasive measurement of subsurface hydrogeological properties. Vista Clara's NMR tools are used in over 90 countries for groundwater, environmental, geotechnical, mining, and energy investigations.

As the only geophysical instrumentation firm solely focused on NMR, Vista Clara leverages unmatched technical expertise and a robust technology portfolio to deliver cutting-edge solutions across a broad and growing range of applications.
