

With Kellogg Garden Products Offering Everything That Your Plants Need

Imagine coming home from work and spending some time in the backyard garden full of beautiful flowers. You will get a positive feeling instantly. There is no better way of reducing stress and refreshing your mind...

Carson, California May 22, 2025 ([Issuewire.com](https://www.issuewire.com)) - Imagine coming home from work and spending some time in the backyard garden full of beautiful flowers. You will get a positive feeling instantly. There is no better way of reducing stress and refreshing your mind other than spending some time amidst nature. However gardening is not an easy task and it requires proper resources. You can purchase them from a reliable source like Kellogg Garden Products.

Introduction to Kellogg Garden Products

Established in the year 1925, Kellogg Garden Products has operated as a family owned company. The operations of this company have spanned 4 generations. They have managed to remain a stable, steadfast family business by following the core values of their founder H. Clay Kellogg like integrity, loyalty, innovation, experience, commitment and generosity.

These values have enabled the company to get highest level of organic satisfaction from two well-known agencies. It has maintained its family centric culture for approximately over 90 years. H. Clay “Hap” Kellogg IV, the grandson of H. Clay Kellogg, became the CEO of this company in 1991. This company donates a portion of their income to numerous charitable programs and organizations.

Products offered by Kellogg Garden Products

Some of the products offered by Kellogg Garden Products are as follows:

Organic soil: Organic soil is a type of soil which is created by the decomposition of plant and animal matter. This results in the formation of a nutrient and mineral rich mini ecosystem where microorganisms will not only survive but thrive.

They will feed on the soil particles and break down essential nutrients into simpler forms, thus making it easier for plants to absorb them. You can grow healthier plants using organic soil. Products which are available under this category are Amend Garden soil, Topper soil, raised bed and potting mix, Patio Plus Premium Outsource Potting Mix, All Natural Garden Soil for flowers and vegetables and All Natural Indoor Potting Mix.

Organic fertilizers: Organic fertilizers are derived from natural sources like compost, manure and worm castings. They not only provide essential nutrients but also improve the soil structure, thus making them beneficial for the microorganisms.

These fertilizers are a healthier alternative to chemical fertilizers. Products available under this category are Rose and Flower Plant Food, Citrus and Fruit Plant Food, All Purpose Plant Food as well as Tomato, Vegetable and Herb Plant Food.

Clients are preferring the products offered by Kellogg Garden Products. For more information, you can visit <https://kelloggsgarden.com/>
