

Worksoft and EPI-USE Labs Announce Strategic Partnership to Streamline Test Data Provisioning for Enterprise Automation

Powering Smarter Testing with Seamless, Compliant SAP Test Data Integration

Addison, Texas May 7, 2025 ([Issuewire.com](https://www.issuewire.com)) - [Worksoft](https://www.worksoft.com), the leading provider of intelligent AI-driven test automation for enterprise applications, and EPI-USE Labs, a global provider of SAP data solutions and managed services, today announced a strategic partnership to revolutionize how enterprises provision high-quality test data across complex SAP landscapes.

This collaboration integrates EPI-USE Labs' advanced test data management solutions with Worksoft's industry-leading continuous test automation platform, delivering a seamless, end-to-end solution for customers who require robust, compliant, and reliable test data for automated testing.

"As enterprise systems grow in complexity, the need for accurate, secure, and readily available test data becomes critical to achieving quality at speed," said Matt Schwartz, CEO of Worksoft. "Our partnership with EPI-USE Labs addresses this challenge head-on, helping our customers increase test coverage, accelerate innovation, and reduce risk."

Through this partnership, joint customers can now automatically provision masked, subsetted SAP test data directly into their Worksoft test environments, enabling more realistic and efficient automated test scenarios. The combined solution empowers enterprise IT and QA teams to:

- Drastically reduce time spent on manual test data preparation
- Ensure compliance with data privacy regulations like GDPR and CCPA
- Improve test accuracy by using production-like data in test environments
- Seamlessly integrate data provisioning into continuous testing pipelines

"Our customers need fast, secure and reliable test data to support rapid changes in their landscape," said Rob Levy, Partner at EPI-USE Labs. "Our partnership with Worksoft enables our customers to automate testing with accurate test data, allowing them to embrace innovation and minimize operational risk."

The partnership is available globally, with joint solution offerings and customer support provided by both Worksoft and EPI-USE Labs. To learn more about how this partnership can benefit your enterprise testing strategy, visit www.worksoft.com or www.epiuserlabs.com

About Worksoft

Worksoft the leading provider of intelligent AI-driven test automation for enterprise applications, empowering the world's largest enterprises to accelerate digital transformation and reduce risk across complex, mission-critical applications. Purpose-built for end-to-end process automation, Worksoft helps global enterprises accelerate digital transformation and reduce risk across SAP, Oracle, Salesforce, Workday, SuccessFactors, ServiceNow, and other mission-critical platforms. Our codeless platform allows both business users and IT to collaborate on automation, delivering 360-degree insights that speed test creation, enhance reuse, and improve quality at scale.

About EPI-USE Labs

With over 42 years of experience, EPI-USE Labs provides software and managed services to over

1,800 customers across 55 countries. They help their customers transform their SAP landscapes, and optimize the performance, management and security of their SAP and SAP SuccessFactors systems.

EPI-USE Labs is part of Group Elephant, which employs over 4,200 people across 42 countries. The Group is a largely employee-owned group of boutique services firms and software companies, non-profits and impact investment organizations. Group Elephant funds and operates the non-profit Elephants, Rhinos & People ('ERP'), focusing on the preservation of at-risk elephants and rhinos in Southern Africa, through the economic upliftment of rural people in areas adjacent to these threatened species.
