Orange City, Florida Jun 22, 2025 ([IssueWire.com](https://www.issuewire.com)) - The InfoComm Show 2025 is about to witness a seismic shift in the Pro AV landscape. XTEN-AV, the award-winning innovator in intelligent AV design and automation solutions, is returning to the InfoComm Conference with a reveal that promises to shake the foundation of the entire AV industry. This year, at Booth #4075, XTEN-AV is preparing to unveil a feature so advanced, so unprecedented, that it's already being whispered about as the most revolutionary advancement the AV world has seen in decades.

And yet — no one knows what it is. Not yet.

The excitement is palpable across InfoComm Orlando. Integrators, designers, consultants, and tech leaders are buzzing in anticipation of what XTEN-AV is calling the "biggest disruption in Pro AV history." As an exhibitor at InfoComm 2025, XTEN-AV is not just making an appearance — it's rewriting the playbook.

A Bold Step into the Future of AV

Over the past few years, XTEN-AV has rapidly emerged as the leading force in AV design automation, with groundbreaking solutions like X-DRAW, x.doc, X-VRSE, and X-Pro redefining what AV professionals can expect from their technology tools. Each of these platforms has transformed core

aspects of AV project workflows — from schematic design and proposal generation to immersive visualization and project management.

But the upcoming reveal at InfoComm 2025 is poised to go beyond transformation. It's set to initiate a new era.

"This isn't just another product launch," said a representative from XTEN-AV. "This is the evolution of an entire industry — and there's nothing like it in the global AV market today."

Where Hype Meets History – InfoComm Show 2025

The InfoComm Show 2025 in Orlando is already being hailed as the most influential conference of the decade for the AV industry. XTEN-AV's participation at the event is a key highlight on the show floor, and Booth #4075 is expected to draw thousands of attendees looking to get the first glimpse at what's being heralded as an industry-redefining innovation.

Attendees at the InfoComm Conference will have exclusive access to hands-on demonstrations of XTEN-AV's full suite of intelligent tools — including:

- **X-DRAW** – The AI-driven schematic generator that eliminates manual system diagramming.
- **x.doc** – A rapid proposal creation tool with integrated product databases and real-time pricing.
- **X-VRSE** – An immersive AV space visualization experience that brings projects to life before they're built.
- **X-Pro** – A centralized project management hub tailored specifically for AV workflows.

And of course, the main event — the **mystery feature** that no one in the Pro AV world has seen before.

What Makes This Launch So Different?

According to early testers, the upcoming XTEN-AV innovation is not just a new feature or product. It's a paradigm shift. Developed based on years of user feedback, AV market analysis, and deep integration of AI, machine learning, and data-driven intelligence, the new tool is designed to:

- Automate AV design tasks that were previously thought to require human-only oversight
- Deliver real-time system optimization based on project parameters
- Enable a level of user personalization and system accuracy that was previously unattainable

And yet — XTEN-AV remains tight-lipped. The exact nature of the tool will not be disclosed until the official unveiling at **InfoComm Show 2025 in Orlando**.

The Countdown Begins – Visit Booth #4075

Professionals across the AV spectrum — from consultants and system integrators to tech buyers and enterprise leaders — are encouraged to be part of this historic moment.

Here's what you'll gain at Booth #4075 at InfoComm 2025:

- **First look** at never-before-seen AV technology
- **Live sessions** with XTEN-AV's intelligent platform tools
- **Expert-led demonstrations** and strategy talks

- **Personalized consultations** for workflow optimization
- **Exclusive on-site deals** and early access features
- **Sneak peek** at the mystery feature reshaping the AV future

Attendees of InfoComm Orlando will also be the first to access limited early adopter pricing, VIP feature unlocks, and partner-level onboarding benefits.

Industry Voices Are Already Talking

“InfoComm 2025 is the moment we’ve all been waiting for,” said one AV systems consultant in anticipation of the reveal. “XTEN-AV has always pushed the envelope, but this feels different. Bigger. Game-changing.”

From Reddit forums and LinkedIn groups to AV industry Slack channels and podcasts, speculation is swirling around the XTEN-AV announcement.

Some call it the “AI brain of AV systems.” Others think it’s a real-time design-to-deployment engine. All we know is — no one has seen anything like it before, and it’s exclusive to **XTEN-AV at InfoComm 2025**.

More Than Just Tools — It’s an AV Ecosystem

What sets XTEN-AV apart at this year’s **InfoComm Conference** is its vision: not just offering tools, but delivering a complete, intelligent AV ecosystem.

By combining AV design, proposal building, immersive visualization, and project management into one seamless cloud-based platform, XTEN-AV enables:

- Faster project turnarounds
- Greater collaboration across teams
- Error-free schematics and proposals
- A dramatically improved client experience

And with the new feature launch, XTEN-AV will deliver capabilities that redefine the roles of AV designers, consultants, and project managers alike.
