

8 Years of Growth: How Wroffy Became a Trusted IT Reseller in India and UAE

Gurgaon, Haryana Jun 25, 2025 ([Issuewire.com](https://www.issuewire.com)) - Wroffy Technologies Pvt. Ltd. has become a major force in the quickly advancing field of digital technology, driving online transformation for companies all over the world. What started as a small startup has become one of the most trusted IT resellers in the market.

A Vision Born in 2017

Founded by Dipesh Bachhish, Sachin Chauhan, and Deepika Nahar, Wroffy was established to bridge the gap between business demands and the rapidly evolving realm of technology. Focusing on technical prowess and customer priorities, the founders wanted to create an organization that would help startups and large enterprises make complicated technology choices with ease.

"From the very beginning, we wanted to be more than just another IT vendor," says Dipesh Bachhish, Co-Founder. "The 8-year milestone has been the result of the hard work of our people and the faith our customers have had in us."

From Licensing to Digital Transformation

Wroffy, as a service provider, has diversified its services to process much more than just software licensing. Today, the company assists startups, MSMEs, and large businesses in migrating legacy systems to the cloud, establishing secure networks, and remaining competitive in an increasingly digital environment.

Wroffy is an authorized reseller and distributor of world-renowned technology companies such as Microsoft, Google, Adobe, Cisco, and others, and businesses can find their one-stop source of original

software, professional guidance, and an ultimate guarantee of post-sales assistance.

Currently, they have a wide range of clients, from public sector organizations in need of strong corporate infrastructure to proficient technology startups in need of cloud solutions.

“We are not simply selling licenses. We are creating roadmaps, working out pain points, and developing long term value for our clients,” added Sachin Chauhan, Co-Founder.

Building Trust Across Borders

Having operational headquarters in both India and the UAE has ensured that Wroffy became a cross-border superpower. Regional presence enables the company to offer its services better to the clients based on tailored prices, local compliance advice, and culturally aligned assistance.

This has come in handy to businesses that are going through the digital transformation that has followed the COVID era. Through Wroffy, many clients have turned to securely deploying remote work solutions, IT complexity and hybrid cloud models.

A Strong Team, A Stronger Vision

Wroffy is successful primarily because it has expert employees with over 10 years of experience in the provision of IT services, marketing and business consultancy. It is a team-oriented way of doing business that does not only provide just transactional relationships but also long-life partnerships.

The leadership of the company shares a philosophy of remaining agile, relying on the regular update of its offerings on the changing needs of clients and changes in the industry.

Looking Ahead

Over the last few years, Wroffy has been offering more solutions in cloud migration, remote work opportunities, cybersecurity, and hybrid infrastructure. The company currently aims at consolidating its operations in the UAE and India, besides remaining innovative to a futuristic client base.

“Our goal is to empower businesses with future-ready solutions,” said Deepika Nahar, Co-Founder. *“We continuously improve our services to help clients remain competitive, flexible, and safe in a fast-evolving digital world as technology advances.”* Visit [Wroffy Technologies](https://wroffytechnologies.com) to learn more about the company and its services.
