

AltuMED Launches Specialized Cardiology Billing Services to Optimize Revenue for Cardiovascular Practices

Advanced AI-Driven Solutions Empower Cardiovascular Practices to Maximize Revenue and Focus on Patient Care

Southfield, Michigan Jun 8, 2025 ([Issuewire.com](https://www.issuewire.com)) - AltuMED, a trusted leader in revenue cycle management (RCM), proudly introduces its cutting-edge Cardiology Billing Services, designed to empower U.S. cardiovascular practices by addressing critical billing inefficiencies. By integrating cardiology-certified expertise with advanced, proprietary AI technology, AltuMED helps practices maximize revenue and streamline operations.

Our tailored solution delivers measurable results, including:

- **98% claim accuracy** for complex cardiac codes (e.g., CPT 93458, 93610; ICD-10 I25.10)
- **40% reduction in claim denials** through real-time auditing and error detection
- **CMS-compliant billing workflows** to ensure regulatory adherence
- **Transparent revenue analytics dashboards** for actionable insights into practice performance

"Cardiology practices are losing valuable time—often more than 15 hours per week—battling claim denials and navigating complex billing processes," said AltuMED's Director of Revenue Operations. "Our specialized Cardiology Billing Services streamline operations, recover lost revenue, and allow

clinicians to prioritize what matters most: delivering exceptional patient care."
