

Apostille Services Rebrands as Secure Apostille Services, Expands with Global Solution

Offering Sworn Translations, U.S. Apostille Services, and Pan-India Document Legalization

The graphic features the 'Secure Apostille Services' (SAS) logo in the top left, which consists of a blue circle with 'SAS' in white and the full name to its right. Below the logo, the text 'MINISTRY OF EXTERNAL AFFAIRS' is in bold blue, and 'APOSTILLE IN INDIA' is in bold orange. A central orange box lists four steps with checkmarks: 'Notarization', 'SDM/State Attestation', 'MEA Attestation', and 'MEA Apostille'. To the right is a photograph of the Parliament Building in India. An orange callout box in the bottom right corner contains contact information: an email icon for 'info@apostilleservice.co.in', a globe icon for 'apostilleservice.co.in', and a phone icon for '7406384899'.

Bengaluru, Karnataka Jun 19, 2025 ([IssueWire.com](https://www.issuewire.com)) - Apostille Services, a trusted name in document legalization since 2017, has officially rebranded as **Secure Apostille Services (SAS Apostille)**. The rebrand represents the company's growing global presence and enhanced service portfolio, which now includes **sworn translations** and **U.S. apostille solutions**. This transformation signifies a new chapter in the company's mission to provide fast, secure, and internationally compliant

documentation services.

Founded by **Lingaraj S K**, SAS Apostille remains under the same leadership and management, ensuring the continuity of its reliable and professional service. Known for its deep expertise in **MEA apostille, embassy attestation, and translation services**, the firm has evolved to meet the needs of a growing international clientele that demands accuracy, transparency, and efficiency.

SAS Apostille now offers **sworn translation services** for legal and official documents destined for European countries such as **Spain, Italy, France, and Germany**. These translations, performed by court-appointed translators, are often mandatory for visa, immigration, academic, or commercial purposes in Europe. By offering sworn translations alongside legalization services, SAS Apostille provides clients with a one-stop solution that eliminates the hassle of coordinating between multiple vendors.

To support its expansion into international markets, SAS has launched a **dedicated U.S. portal** at <https://apostilleserviceus.com>. This new platform offers apostille services for **FBI background checks, U.S. diplomas, birth and marriage certificates, corporate documents**, and more. With a growing number of clients needing U.S. documents authenticated for international use, the new site is designed to streamline the process with simple online ordering, status tracking, and expert support.

In India, SAS Apostille continues to serve clients across all major metropolitan areas, including **Delhi, Mumbai, Bangalore, Chennai, Hyderabad, Kolkata, Pune, Ahmedabad, Chandigarh, and Kochi**. The company provides door-to-door services such as **document pickup and delivery**, which has made it a preferred choice among working professionals, students, NRIs, and corporates alike.

The rebranding initiative also reflects the company's renewed focus on **digital accessibility and customer experience**. With improved websites, secure payment gateways, and faster response times, SAS Apostille is committed to offering a tech-enabled approach to a traditionally manual process. The aim is to simplify international document requirements for individuals and businesses, regardless of their location.

SAS Apostille has assisted thousands of clients in legalizing documents for more than 100 countries, including destinations within the Hague Apostille Convention and outside it. Whether it's a degree certificate for Italy, a birth certificate for Germany, or commercial invoices for the UAE, the company offers tailored solutions that meet the legal and consular requirements of each jurisdiction.

"The rebrand aligns with our mission to provide secure, transparent, and globally accessible services," said Lingaraj S K, Founder of SAS. "As more individuals and businesses move across borders, the need for trusted apostille and attestation services is greater than ever. We are evolving to meet that demand with enhanced offerings, a global footprint, and a continued commitment to quality."

Clients can continue to access Indian services at <https://www.apostilleservice.co.in>, while U.S.-based services are available at <https://apostilleserviceus.com>. With its comprehensive range of services, multilingual capabilities, and global partnerships, SAS Apostille is well-positioned to support cross-border documentation needs for years to come.
