

Biotuff Launches World-First Compostable Bin Cleaning Sheets

A Sustainable Solution to Smelly, Dirty Bins – Without the Waste

Melbourne, Victoria Jun 2, 2025 ([Issuewire.com](https://www.issuewire.com)) - Australian eco-innovation leader **Biotuff** has just unveiled a global first: **Eco Friendly Bin Cleaning Sheets** – a revolutionary product that cleans, deodorises, and sanitises household bins without harsh chemicals, plastic packaging, or environmental guilt.

Designed for convenience and powered by nature, Biotuff Bin Cleaning Sheets are made from **plant-based, biodegradable fibres** and infused with a non-toxic formula that eliminates odours, grease, and germs in seconds. Simply toss a sheet into your bin, let it work its magic, and enjoy a fresher, cleaner waste space – all without waste.

“This is a game changer for everyday households,” says **Gary Nizam**, founder of Biotuff. “Our customers care deeply about reducing plastic and harsh chemical use, and now we’ve made it easier than ever to clean your bin sustainably – no sprays, no wipes, and zero plastic.”

Unlike traditional bin cleaning products, Biotuff’s new sheets are:

- **100% eco friendly**
- **Infused with natural deodorisers and essential oils**
- **Safe for pets, kids, and sensitive skin**
- **Packaged plastic-free**

This marks another major milestone for Biotuff, known for leading Australia’s movement toward **home compostable and carbon-conscious household solutions**. The Bin Cleaning Sheets follow the successful launch of Biotuff’s **Dishwashing Sheets** and **Laundry Detergent Sheets**, reinforcing the brand’s mission to eliminate plastic from every corner of the home.

The product is now available for purchase online via www.biotuff.com.au and selected eco retailers.

About Biotuff

Biotuff is an Australian-owned brand dedicated to creating high-performance, **certified compostable** alternatives to everyday plastic and chemical-based household products with over 10 years in the market. With a commitment to **real sustainability (no greenwashing)** and innovation, Biotuff helps Australians reduce their plastic footprint without compromising on quality or convenience.
