

Boca Raton Dental Practice Introduces Same-Day Crowns With Advanced CEREC Technology

Boca Raton, Florida Jun 17, 2025 ([Issuewire.com](https://www.issuewire.com)) - In an exciting development for dental patients across Palm Beach County, [Harris Dentistry](https://www.harrisdentistry.com) has introduced **same-day dental crowns** using cutting-edge [CEREC](https://www.cerectec.com) technology. This major upgrade in dental care brings faster, more convenient treatment options to residents who are seeking efficient solutions without compromising on quality or comfort.

Traditionally, receiving a dental crown required at least two visits—one to take impressions and place a temporary crown, and another (after a waiting period of a week or more) to fit the permanent crown. This process could be inconvenient, especially for those with demanding schedules. Now, with CEREC (Chairside Economical Restoration of Esthetic Ceramics), patients at Harris Dentistry can receive a permanent crown in just a single appointment.

How It Works: A High-Tech Upgrade to Traditional Dentistry

CEREC technology uses advanced CAD/CAM (Computer-Aided Design and Manufacturing) systems to

digitally scan the patient's teeth, design a customized crown, and mill it on-site—all in one visit. The ceramic material used is strong, durable, and aesthetically matches the natural teeth. What's more, the precision of digital imaging eliminates the discomfort and mess of traditional dental impressions.

"Patients no longer have to deal with temporary crowns falling out or make time for multiple appointments," says Dr. Harris. "The entire process—from scanning to placing the final crown—takes about two hours, and the results are just as durable and beautiful as those made in a dental lab."

Improving Patient Experience With Same-Day Solutions

The convenience offered by this technology is especially important in today's fast-paced world. By streamlining the process, Harris Dentistry aims to reduce patient anxiety, minimize time spent in the dental chair, and eliminate the waiting period between visits.

Whether you need to restore a damaged tooth, replace a large filling, or strengthen a weakened tooth structure, CEREC crowns provide a long-lasting and natural-looking solution. Patients can enjoy restored function and aesthetics in just one day—without disrupting their work or personal commitments.

The introduction of this innovative technology is part of the practice's ongoing commitment to remain at the forefront of modern dentistry. As a trusted [dentist in Boca Raton](#), Harris Dentistry is continuously investing in advanced tools and techniques that benefit their patients' health and overall experience.

A Personalized Approach to Restorative Dentistry

While the technology is impressive, what truly sets the practice apart is their focus on personalized care. Each CEREC restoration is custom-designed to fit the patient's unique dental anatomy, ensuring optimal comfort, functionality, and appearance.

"Our goal has always been to make dental care more accessible, more comfortable, and more efficient," says Dr. Harris. "CEREC allows us to offer all three. It's a big win for our patients."

Harris Dentistry's team is trained extensively in digital dentistry and takes pride in offering solutions that are not only effective but also minimally invasive. By reducing the need for temporary materials and minimizing patient visits, they're helping patients feel more at ease and confident in their dental care journey.

About Harris Dentistry

Located in the heart of Boca Raton, Harris Dentistry provides comprehensive dental care in a warm and welcoming environment. The team offers a full range of services including cosmetic dentistry, dental implants, preventive care, and now, same-day restorations with CEREC. With a focus on comfort, transparency, and excellence, the practice continues to be a go-to destination for families and individuals seeking modern dental solutions in the area.
