

Digital Consultants Named SECAF Finalist Two Years Running and Wins 2025 Executive of the Year Award

Firm achieves back-to-back finalist status at SECAF Awards and wins top executive honor, signaling continued dominance in federal IT and cybersecurity markets.

Alexandria, Virginia Jun 3, 2025 ([Issuewire.com](https://www.issuewire.com)) - Digital Consultants LLC has earned a top industry honor at the 2025 SECAF Government Contractor Awards, where President and COO Stephan Picard won the Executive of the Year award for contractors with revenues of \$25 million or less. The win crowns two consecutive years of recognition—Digital Consultants also secured finalist status in the prestigious SECAF Government Contractor of the Year category (\$15M–\$27.5M) for the second year in a row.

SECAF (Small and Emerging Contractors Advisory Forum) spotlights high-performing companies that demonstrate excellence, innovation, and leadership in the federal contracting space. Digital Consultants' consistent recognition reflects its explosive growth as an SBA 8(a) certified Small Disadvantaged Business, posting over 75% year-over-year expansion while delivering cutting-edge federal IT services, cybersecurity, and digital transformation solutions to government clients.

"We're deeply honored to be named a finalist two years in a row and to take home the Executive of the Year award," said Picard. "This achievement reflects the exceptional talent, dedication, and grit of our team. Together, we're transforming how federal agencies meet their missions through bold ideas and

trusted execution.”

Driven by a clear strategy, disciplined operations, and a people-first philosophy, Digital Consultants continues to secure premier contract vehicles—including GSA STARS III (ranking in the top 1.5% by award value) and the GSA Polaris contract—positioning the firm to support a growing base of defense and civilian clients as a trusted government technology integrator.

“Leading with our People” defines every facet of Digital Consultants’ culture. Stephan Picard’s leadership has fostered empowered teams, agile operations, and an environment of continuous innovation. As a result, the company consistently exceeds client expectations, captures increasingly complex prime contracts, and forges high-impact partnerships.

As Digital Consultants prepares for life beyond the 8(a) program, it is expanding its presence in Navy and DoD markets, extending operations into Europe and the Middle East, and investing in workforce development and quality certifications—including CMMI Level 3 Services and CMMC 2.0. These efforts reinforce the firm’s position as one of the fastest-growing federal IT services and cybersecurity contractors in the Mid-Atlantic region.

About Digital Consultants LLC

Founded in 2008, Digital Consultants provides advanced IT engineering and operations support, cybersecurity, audiovisual integration, and training services. The company supports defense and civilian agencies with mission-critical programs that strengthen national security and operational resilience.

About SECAF

Based in Falls Church, Virginia, SECAF recognizes the accomplishments of small and emerging government contractors in the Washington, DC area. The SECAF Awards spotlight project impact, innovation, and executive leadership in the federal contracting sector.
