

Elite Elevators Launches the X400 – Malaysia's First Smart, Multi-mode Gearless Home Lift

Meet the X400 by Elite Elevators: Malaysia's first gearless, belt-driven home lift with 4 ride modes, app control, and Alexa integration. A stylish, efficient, and connected mobility upgrade for your home.

Kuala Lumpur, Malaysia Jun 24, 2025 ([Issuewire.com](https://www.issuewire.com)) - Elite Elevators Malaysia has officially debuted the X400 and X400 Plus, the world's first multi-mode gearless residential lift employing smart engineering, a minimalist aesthetic, and state-of-the-art magnetic drive technology. In launching the X400, Elite Elevators Malaysia has launched Malaysia's first smart, gearless residential lift—a game changer for home mobility.

The X400 is more than a standard mobility solution. It represents the pinnacle of home elevator technology. The X400 is CE approved, meeting strict European safety, performance, and reliability standards for [residential home lifts](#). It is engineered for contemporary Malaysian home architectural requirements, from urban duplexes to large villas.

The Future of Home Elevators

The X400 is Malaysia's first gearless, smart, belt-driven home lift. It offers smoother, quieter rides while making significant advancements in energy efficiency over traditional lifts. With no need for toxic grease, the X400 offers a smarter, safer, cleaner, and more environmentally friendly means of in-house mobility.

What truly sets the X400 apart is its four dynamic ride modes:

- Sport Mode for faster ascents and descents
- Eco Mode to optimize energy usage
- Comfort Mode for a smooth, gliding ride
- Personalised Mode to adapt to user preferences

The X400 also leads in smart features. It's equipped with IoT-enabled remote diagnostics, allowing real-time performance tracking and servicing updates. Homeowners can operate the lift via Elite's in-house app, use Alexa voice commands, or manage settings through the elegant touchscreen cabin interface, turning the X400 into a fully connected, future-ready mobility system.

Designed for Malaysian Homes

From compact urban spaces to multi-level bungalows, the [X400](#) is built to blend effortlessly into the heart of any home. Its modular structure, small footprint, and advanced customization options allow homeowners to choose from a wide range of interior finishes, display screens, lighting options, and cabin sizes.

The lift uses magnetic-driven controls for leveling—one of the most precise systems on the market today. It also includes smart touchscreen controls, real-time diagnostics, and advanced safety features, ensuring both a high-tech and high-comfort experience for users of all ages.

Top-notch Luxury, at Affordable Prices

[Elite Elevators](#) has priced the X400 to be within reach of families looking for both safety and sophistication. Starting at MYR 160,000, the X400 brings global innovation into Malaysian homes—without compromising on performance or aesthetics.

Experience the X400 Firsthand

Homeowners, architects, and developers are invited to explore the X400 live at Elite Elevators' Experience Center in Wangsa Maju, Kuala Lumpur. The in-house experts provide one-on-one consultations, product demonstrations, and customized lift planning for every space and budget.
