

Florida Boy Desperately Fights Aggressive Grade 4 Brain Cancer; Family Urgently Raising Funds for Lifesaving Treatment

"Help Us Save Little Solomon's Life" Campaign: This fundraising campaign was initiated by the family of Solomon, a boy from Orlando, Florida, diagnosed with Grade 4 Medulloblastoma.

California City, California Jun 13, 2025 ([Issuewire.com](https://www.issuewire.com)) - Solomon, an adorable boy from Orlando, Florida, is facing the greatest challenge of his young life after being diagnosed with **Grade 4 Medulloblastoma**, an extremely aggressive form of brain cancer. His family has launched an urgent fundraising campaign, "Help Us Save Little Solomon's Life," at <https://donorbox.org/help-us-save-little-solomon-s-life-from-grade-4-medulloblastoma>, to cover the exorbitant costs of specialized treatment and ongoing medical care, essential for his chance at survival.

Solomon's battle began suddenly when his parents noticed alarming symptoms. A CT scan revealed the terrifying tumor, which quickly led to an emergency surgery for its removal. Although the initial operation was a success, pathological analyses confirmed the grim diagnosis: Grade 4 Medulloblastoma. This form of cancer requires intense and complex treatment, including chemotherapy and radiation therapy,

which incur astronomical costs.

"Every day is a fight for Solomon and for us as a family," stated **Laura Windsor, Solomon's mother**. "We were devastated by the news, but we refuse to lose hope. Solomon is a vibrant child with a smile that brightens any room, and he deserves every chance. The costs of treatment far exceed our financial capacity, and we are appealing to the generosity and compassion of people to give Solomon the chance to get well and live his childhood."

Funds raised through the Donorbox campaign will be used entirely for:

- **Hospitalization and medical procedure costs:** Including future surgeries, complex imaging investigations, and consultations with pediatric oncology specialists.
- **Chemotherapy and Radiation Therapy:** These are vital components of the aggressive treatment plan for Grade 4 Medulloblastoma.
- **Medications and Medical Supplies:** Necessary for managing side effects and complications.
- **Rehabilitation and Therapy:** To aid in Solomon's physical and cognitive recovery after treatments.
- **Transportation and Accommodation:** Expenses associated with travel to specialized hospitals and clinics, which may be located at a distance.

Solomon's family is determined to fight alongside him every step of the way and provide him with the best chances for recovery. They invite the public to read Solomon's full story and contribute to saving his life.
