

Groundbreaking White Paper Reveals \$15 Billion in Classified U.S. Technology Programs Linked to UFO/UAP Investigations

New Report submitted to the House UAP Caucus Unveils Groundbreaking Methodology Linking Advanced U.S. Research Programs to UFO Phenomena

Washington, D.C, District of Columbia Jun 30, 2025 ([IssueWire.com](https://www.IssueWire.com)) - A newly released white paper titled “Findings from the Application of ‘*Engineering Infinity: Earth’s First Interstellar Blueprint*’ as an Investigative Tool for Researching Suspected Classified Technology Programs Relating to UFO/UAP Disclosure” is set to transform Congressional oversight of advanced technology programs and UFO/UAP investigations.

Prepared for members of the United States Congress, this comprehensive report introduces a novel investigative methodology that leverages the technical framework of “*Engineering Infinity*”—a book documenting the alleged reverse-engineering of a UFO in the USSR during the 1980s—as a correlation tool for evaluating classified government research and whistleblower testimony.

The white paper was formally submitted to the House UAP Caucus on Wednesday. Caucus members were invited to provide comments prior to the public release of this report. As of the release deadline, the UAP Caucus has not provided a comment on the report’s findings.

Key Findings:

- **\$15+ billion** in confirmed U.S. government research identified across **42 technical domains**.
- **85–95% correlation rate** between “Engineering Infinity” scientific topics and U.S. declassified programs.
- **76% correlation** between metaphysical topics (e.g., remote viewing, consciousness research) and documented government projects.
- **50+ institutions** identified as conducting related research, with high predictive accuracy for research locations and program scope.

Strategic Value for Congress:

- Provides an unprecedented, cost-effective tool for oversight of classified technology development.
- Enhances assessment of whistleblower credibility and technical feasibility of claims.
- Enables rapid identification of undisclosed research programs and facilities.
- Offers actionable recommendations for immediate, medium-term, and long-term Congressional action.

Notable Case Studies:

The methodology successfully predicted the involvement of Wright-Patterson Air Force Base, Los Alamos National Laboratory, and Lockheed Skunk Works in advanced aerospace and materials research—findings corroborated by recent whistleblower testimony.

Recommendations for Congressional Action:

- Immediate facility inspections and document requests for high-correlation programs.

- Adoption of the “Engineering Infinity” correlation methodology for all UAP-related oversight.
- Strategic planning for technology disclosure, economic impact assessment, and international coordination.

Quote from Gene Sticco (a retired USAF Staff Sergeant) the White Paper’s Lead Author:

“This methodology offers Congress a powerful, data-driven framework for verifying extraordinary claims and ensuring responsible stewardship of the nation’s most advanced technologies. The evidence supports immediate adoption for ongoing UAP investigations and broader classified program oversight and offers unmatched value for pattern recognition, hypothesis testing, and technical analysis within the open-source intelligence community.”

The full text of the White Paper is available for public review on the author’s website.

About the White Paper:

“Findings from the Application of “Engineering Infinity: Earth’s First Interstellar Blueprint” as an Investigative Tool for Researching Suspected Classified Technology Programs Relating to UFO/UAP Disclosure” a White Paper to Congress, June 2025, presents a validated, open-source methodology for correlating classified U.S. technology programs with advanced physics and engineering concepts, providing Congress with new tools for oversight, transparency, and national security.

The paper is based on science presented in “Engineering Infinity: Earth’s First Interstellar Blueprint” - arguably the most technically sophisticated and ambitious book on the “science of UFOs” available to the public. It stands apart from the field in its level of engineering detail, its alignment with advanced Cold War research, and its willingness to propose testable scientific frameworks; providing a blueprint for further investigation—and a new standard by which other UFO science books can be measured.
