

# Imagen Network Streamlines Multichain Profile Management for Social Scalability

Imagen enables seamless identity coordination across blockchains to elevate user control in Web3 networking.

**Seattle, Washington Jun 10, 2025** ([Issuewire.com](https://www.issuewire.com)) - [Imagen Network](https://www.imagen.network) (IMAGE), the first decentralized social platform powered by AI, has launched its upgraded multichain profile management system. The new framework simplifies identity access and permissions across various chains while offering full user control and AI-assisted customization.

This rollout enhances scalability for users managing assets, content, and social interaction across multiple decentralized networks. By incorporating real-time sync logic and adaptive visibility tools, Imagen ensures creators, builders, and social communities can operate securely and seamlessly across chains.

Imagen's evolution reinforces its position as a pioneer in AI-led Web3 infrastructure. With personalized profile layers and multichain reach, the platform offers a scalable foundation for decentralized communities to thrive, share, and govern their data.

## About Imagen Network

Imagen Network is the world's first decentralized social networking platform powered by AI. It empowers users with personalized content, modular tools, and full data ownership across multichain environments for an open, intelligent, and user-first Web3 experience.
