

Indian Souls Aims to Empower 2 Million Indians

IndianSouls.in, a fast-growing civic information platform, is intensifying its efforts to help 2 million Indian citizens understand and access government schemes.

Delhi, India Jun 15, 2025 ([Issuewire.com](https://www.Issuewire.com)) - [Indian Souls](https://www.Indiansouls.in), a website that's growing fast and helps people with government information, has announced it wants to help 2 million Indian people by the end of 2025. This means they want to help even more people find and use government programs and benefits without confusion. So far, they've helped over 1.3 million people.

IndianSouls.in was started because getting help from the government can be hard. They want to make it easier for everyone to understand and use these programs.

"We at IndianSouls.in believe that when people know things, they have more power," says Sudhir Singh, the boss of IndianSouls.in. "Our goal is to make it simple for every Indian to learn about and get the government help they need to make their lives better. Helping 2 million people by the end of 2025 is a big step for us in making India a place where everyone is informed and doing well."

To help even more people, IndianSouls.in is doing these things:

More Languages: They are adding information in more Indian languages besides English and Hindi. This will help more people understand.

Working with Others: They are teaming up with groups like local helpers, schools, and community centers all over India. This helps them reach more people and give support.

Making the Website Easier: They are always making their website better so it's easy for everyone to use. This means simple steps and ways to get help if needed.

Using the Internet: They are using social media and online ads to reach more people who need information about government programs.

IndianSouls.in is dedicated to being the best place for Indians to find out about and use government help. By making things simple, they are helping to make a stronger and fairer society.

About Indian Souls:

IndianSouls.in is a website that helps Indian people easily find information about government programs and benefits. They use their website, social media, and work with local groups to make sure everyone can understand their rights and get the help they need.
