

Lynn Dental Care Brings World-Class Dental Innovation to Dallas with EMS AIRFLOW® Technology

Lynn Dental Care Among First in Dallas to Offer Revolutionary Swiss Biofilm Removal System with EMS AIRFLOW®—a Painless, Precision-Based Alternative to Traditional Cleanings

Dallas, Texas Jun 27, 2025 ([Issuewire.com](https://www.issuewire.com)) - Lynn Dental Care continues to revolutionize preventive dental care in Dallas by offering [EMS AIRFLOW® and Guided Biofilm Therapy \(GBT\)](#)—an advanced Swiss technology that redefines the standard for dental cleanings and biofilm management.

Developed by **EMS (Electro Medical Systems)**, a global leader in precision dental technology headquartered in Switzerland, AIRFLOW® and Guided Biofilm Therapy (GBT) have become the gold standard in modern hygiene protocols. This innovative system removes harmful biofilm gently and effectively, making dental cleanings more **comfortable, accurate, and minimally invasive**.

While EMS AIRFLOW® is being adopted globally, it remains **rarely used in Dallas**. Research shows that **fewer than 25 dental clinics** in the Dallas metro area are certified GBT providers or offer EMS AIRFLOW® technology to patients. Lynn Dental Care is proud to be among this elite group—**one of the first in the region** to fully implement the **eight-step GBT protocol**, setting a new bar for patient care in Texas.

“The EMS AIRFLOW® system allows us to perform biofilm removal with unparalleled precision and comfort,” said [Dr. Brock Lynn](#), board-certified periodontist and founder of Lynn Dental Care. “We are committed to using the best tools available—not just to clean teeth, but to improve long-term oral and

systemic health.”

Unlike traditional dental cleanings, EMS AIRFLOW® uses **air, warm water, and erythritol powder** to gently remove biofilm and early calculus **above and below the gum line**, without pain or abrasive instruments. This non-invasive approach can be used safely on implants, orthodontics, veneers, and natural teeth—making it an ideal option for nearly every patient.

What Sets Lynn Dental Care Apart?

- Among **fewer than 25 providers** in the Dallas area using certified EMS AIRFLOW® technology
- Offers the complete **Guided Biofilm Therapy** system, not just AIRFLOW® polishing
- Integrates advanced periodontal and surgical expertise for comprehensive care
- Combines modern technology with **holistic and biological dental approaches**

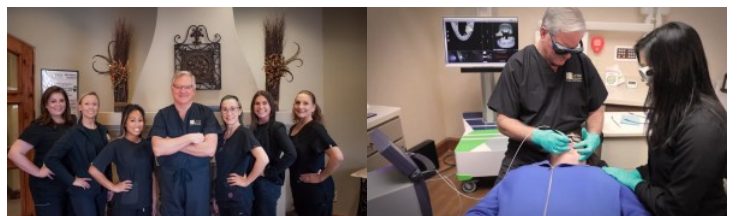

In addition to EMS AIRFLOW®, the practice is equipped with **CBCT scanners, ozone water therapy, platelet-rich fibrin (PRF), iTero® 3D imaging, and laser diagnostics** to provide safe, efficient, and customized care for every patient.

Lynn Dental Care invites new and returning patients to experience the future of dental cleanings with EMS AIRFLOW® in a spa-like setting where science, precision, and holistic care converge.
