

Malliqo Revolutionizes E-Commerce with the Launch of the World's First 3D Virtual Shopping Mall App

A Chennai-based startup unveils a futuristic retail experience where users walk through a virtual mall, interact with sellers, and shop live from global and indie brands.

Chennai, Tamil Nadu Jun 18, 2025 ([Issuewire.com](https://www.issuewire.com)) - The e-commerce world just took a giant leap forward with the official launch of **Malliqo**, a path-breaking 3D virtual mall app that combines the realism of offline shopping with the convenience and excitement of a futuristic metaverse environment.

Malliqo allows users to digitally stroll through a hyper-realistic 3D mall where they can discover AI-powered boutiques, interact with real-time seller avatars, and shop from global marketplaces and indie creator pods—all from their mobile phone or desktop.

"Shopping should be an experience, not a scroll," says the Malliqo team. "We wanted to bring back the thrill of window-shopping, real-time engagement, and spontaneous discovery—but with a digital twist. Malliqo is retail reimaged."

Key Features of Malliqo:

- Immersive 3D Navigation: Explore mall corridors like you're really there.
- AI-Powered Smart Stores: Each store adapts to the shopper's taste.
- Live Seller Avatars: Speak directly to store reps in real time.
- Global Indie Pods: Find unique products from emerging designers & makers.
- Mallie™, Your AI Guide: Smart in-app assistant for store directions, deals, and updates.
- Multi-Platform Availability: Now live on Android, iOS, and Web.

Built with next-gen technology and deep design thinking, Malliqo isn't just another marketplace—it's a social-commerce ecosystem, entertainment hub, and a virtual city rolled into one.
