

Minop Cloud Rolls Out Sleek New UI/UX Design for a Faster, Smarter Biometric Time and Attendance Experience

Minop Cloud unveils a sleek new UI/UX for its biometric time and attendance system, offering faster performance, smoother navigation, and an improved user experience

The graphic features a light blue background with a subtle cloud pattern. In the top right corner is the MINOP logo, which consists of a stylized orange and blue icon followed by the word "MINOP" in blue. The main headline "MinopCloud Gets a Makeover!" is written in a large, bold, dark blue font. Below it, a sub-headline "Introducing Our New UI/UX - Sleeker, Faster, Smarter!" is in a smaller, dark blue font. The central part of the graphic is divided into three sections. The first section, labeled "BEFORE" in a dark blue rounded rectangle, shows a screenshot of the old, cluttered UI. The second section, labeled "AFTER" in a dark blue rounded rectangle, shows a screenshot of the new, clean and modern UI. The third section, labeled "NOW LIVE" in a dark blue rounded rectangle, contains two circular icons: one with a smartphone icon labeled "Mobile Responsive" and another with a lightning bolt icon labeled "Lightning-Fast Performance". At the bottom right, a call to action reads "Experience the all-new MinopCloud - Responsive Across All Devices" in a dark blue font.

Experience the all-new MinopCloud - Responsive Across All Devices

Ahmedabad, Gujarat Jun 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - Minop Cloud is a leading cloud-based workforce and payroll management platform, has launched a major UI/UX update designed to improve loading speeds, deliver cleaner visuals, and create a more intuitive navigation experience. This redesign reflects the company's continued commitment to user-first innovation and operational clarity. The focus is on making every interaction more transparent and purposeful across HRMS functions such as employee self-service, utilities, and attendance management.

Minop Cloud is the only cloud-based biometric attendance and payroll software that offers an attendance API. With existing deployments across education and manufacturing sectors, and backed by Mantra Softech India Pvt. Ltd., the platform is steadily expanding its presence in both the biometric and HRMS markets. The redesigned interface is purpose-built for performance, simplifying how HR teams and employees work with the platform every day.

"This update is more than a facelift," said a senior product lead at Minop Cloud. "It's about improving real-world workflows. We focused on speed, clarity, and usability so users can accomplish more with fewer clicks."

Key Highlights of the New UI/UX

Focus on UX Writing and Microcopy

Microcopy is now sharper, easier to follow, and written to help users act without hesitation.

Bold Typography

Refined fonts and consistent spacing make every screen easier to read and quicker to scan.

Simplified Navigation

Menus are now clearer and more intuitive, making it easier to switch between attendance, payroll, and compliance features.

Responsive Across Devices

The layout adapts seamlessly across desktop and mobile with real-time responsiveness built in.

Improved Dashboard Insights

Graphs, alerts, and status indicators have been reworked to be clearer, more actionable, and faster to understand.

The Thought Process Behind This Action

The redesign was driven by user feedback and real usage patterns. It started with hundreds of user interviews and workflow studies to understand where people lost time, struggled with navigation, or felt unsure about their next steps. From confusing buttons to hidden menus, each friction point was mapped and addressed. The goal was not just to improve visual appeal but to reduce unnecessary effort and streamline the path from login to action.

Every change supports a measurable improvement. Load times are faster, user flows are shorter, and help text is clearer. The new UI/UX is not only modern but intentional. It is designed to let HR leaders and employees focus on their work instead of fighting the software. Whether it's managing shifts or tracking payroll compliance, the experience is now simpler, smarter, and built for scale.

About Minop Cloud Minop Cloud is a secure, cloud-native platform built by Mantra Softech to help Indian businesses manage attendance, payroll, contract labour, and workforce compliance. Integrated with biometric and IoT devices, the platform provides real-time transparency and operational control across organisations of any size.
