

New International Business Pact Forged Between Jondaire Capital and Daibon Korea

**Jondaire
Capital**

New York City, New York Jul 7, 2025 ([IssueWire.com](https://www.IssueWire.com)) - Daibon Korea, a premier provider of industrial automation, smart logistics, and energy integration solutions, has officially entered into a business partnership with Jondaire Capital, a US-based investment and advisory firm operating across real estate, energy, logistics, and infrastructure finance. This transnational partnership is designed to accelerate cross-border development, global project execution, and strategic capital deployment across

North America and Asia.

The two firms will collaborate on a range of infrastructure projects, with initial efforts focused on the development of logistics hubs and clean energy integration sites in major US markets such as Texas, California, and New York. The combined value of projects under review for Phase I exceeds 200 million USD.

“We see tremendous potential in this partnership,” said **Sean Kwon**, CEO of Daibon Korea. “Our team has built a legacy of delivering advanced industrial solutions across Asia. Jondaire Capital brings deep financial structuring experience and access to global capital markets. Together, we are positioned to lead transformative initiatives in logistics and energy infrastructure.”

Benine Hamdan, Managing Partner of Jondaire Capital, added, “This is more than a financial partnership. It is a long-term collaboration driven by shared values of innovation, execution, and global scalability. Daibon’s engineering capabilities matched with our investment strategy will help deliver meaningful value to both markets.”

Under the agreement, the companies will co-establish a joint working group to identify and co-execute high-impact industrial and energy projects. The firms are also planning to co-host the inaugural **International Investment and Innovation Forum** in late 2025, uniting public and private sector leaders to explore cross-border opportunities in logistics, advanced manufacturing, and clean energy systems.

The announcement comes at a time when global supply chains, energy transition strategies, and industrial modernization are top priorities for both governments and the private sector. This partnership reflects a growing emphasis on international cooperation and strategic investment alignment.

About Jondaire Capital

Jondaire Capital is a global investment and advisory firm specializing in real estate, oil and gas, logistics, and infrastructure finance. Headquartered in New York, Jondaire structures and funds high-value projects across the United States, the Middle East, and Asia.
