

## ProQ Systems- Bringing Clarity to Project Chaos

Projects often go off track not because of a lack of ambition, but because teams are stuck using outdated tools, vague plans and unclear accountability...

**Orlando, Florida Jun 8, 2025 ([Issuewire.com](https://www.issuewire.com))** - Projects often go off track not because of a lack of ambition, but because teams are stuck using outdated tools, vague plans and unclear accountability. Spreadsheets multiple deadlines and meetings can turn into cycles of confusion. Often times leadership remains in the dark until it's too late. ProQ systems exist to stop that from happening.

### Introducing ProQ Systems

ProQ Systems is a reputed business development company, providing marketing, leadership development and training services. The company doesn't try to be everything. Rather it focuses on helping teams organize work in a way that leads to actual results. The platform makes planning simple and visual, so teams can see exactly what needs to be done, who's doing it and what might get in the way.

The company provides the tools to seamlessly and systematically combine proven scalability measures and international development into any of its client's teams. They focus on the 4 pillars of any business - Sales and Marketing, Finance, Operations and Culture and Training.

### History of ProQ Systems

ProQ began with the combined drive and experience of its founders, Madeleine MacRae and Thomas MacDonald. Both saw the same problem from different angles: too many entrepreneurs hit a ceiling trying to reach \$10 million in annual revenue. They work hard, they have the vision—but something's missing.

Most business owners want more than just growth. They want teams that work well, operations that don't burn out their staff, and a culture that doesn't depend on one person holding everything together. But many leaders are left trying to figure it out without the right support.

## **How Does ProQ Systems Work?**

At the center of this framework is the concept of the “North Star,” a central objective that unites teams and processes. By concentrating on this guiding principle, businesses reduce confusion and work toward measurable progress.

The ProQ method begins with a review of where the business stands. This is followed by a strategy phase built around clear goals. The model offers businesses hands-on support during the execution phase. The system doesn't just set direction. It stays with the company to ensure continued progress.

## **ProQ Systems and its CoPilot Model**

The standout feature of ProQ's services is the CoPilot Model, a personalized, one-on-one partnership that acts as an organizational compass. Unlike traditional coaching, the CoPilot blends coaching, consulting, training and facilitation to deliver real-time insights and dynamic strategies.

Each CoPilot tailors the ProQ Framework to a business's unique needs, helping leaders navigate complex decisions, avoid cookie-cutter solutions, and build repeatable systems for growth. Clients have praised the mode since it has allowed them to find great talent and scale without them being in the bottleneck.
