

R&B Wire® Launches Next-Generation Bulk Transport and Turnabout Trucks

Santa Ana, California Jun 14, 2025 ([IssueWire.com](https://www.issuewire.com)) - R&B Wire Products is excited to announce its newly redesigned 48 Cubic Foot Poly Trucks. Built for serious volume and performance, these next-generation models offer a sleek new look and smart upgrades designed for high-volume linen and laundry operations.

“We didn’t just redesign these trucks; we rethought them from the ground up,” said Grant Rawlins, President of R&B Wire Products. “We focused on three key things: ergonomics, user efficiency, and long-term durability, because your team deserves equipment that works as hard as they do!”

48 Cubic Foot Turnabout Truck – Model #749-PS

Engineered for efficiency and ergonomics, this unit is built to streamline workflow. Adjustable poly shelves slide from vertical to horizontal without removal, allowing quick transitions from soiled linen to clean delivery. It features a fully welded, powder-coated steel base for added strength, along with a smooth, easy-to-clean interior and a tapered floor with integrated drain holes. Comes standard with upgraded 6" heavy-duty non-marking TPR casters (2 rigid, 2 swivel) and sealed dual precision bearings for smooth, quiet rolling.

48 Cubic Foot Bulk Transport Truck – Model #849

Designed for demanding environments, this rugged workhorse includes a lower front opening for easier

loading, a fully welded, powder-coated steel base, and a seamless interior with a tapered floor and built-in drain holes. Comes standard with upgraded 6" heavy-duty non-marking TPR casters (2 rigid, 2 swivel) and sealed dual precision bearings for quiet, effortless mobility.

Both units come in blue, gray, or black, and are available for purchase starting June 23rd, 2025.

These new units reflect R&B Wire's ongoing commitment to modern design, blended functionality, and long-lasting performance. For specifications, options, and accessories, visit www.rbwire.com
