

Revolutionising Jobsite Organisation: Introducing the JCB Site System

JCB Tools are proud to introduce the JCB Site System – a market-leading, modular storage ecosystem built for the modern jobsite.

Pembrokeshire, Wales Jun 23, 2025 ([Issuewire.com](https://www.issuewire.com)) - In a market driven by innovation, practicality, and smart design, the way we store, organise, and transport our tools has evolved dramatically. Gone are the days of standalone toolboxes. Today, professionals and serious DIYers demand connected systems that offer seamless integration, mobility, and adaptability. That's why we're proud to introduce

the **JCB Site System** – a market-leading, modular storage ecosystem built for the modern jobsite.

From Toolboxes to Tool Ecosystems

The jobsite has changed – and so have the needs of those working on it. The JCB Site System has been developed with deep insight into market trends:

- **Connected Systems Over Single Units:** Professionals want flexibility. The JCB Site System allows users to build, expand and customise their storage with stackable components and modular functionality.
- **Influencer-Led Demand:** With tools influencers highlighting the shortcomings of even big-name systems, the JCB Site System delivers on what others miss – durability, organisation, and innovation.

Why the JCB Site System Stands Out

Engineered with performance and practicality in mind, the JCB Site System offers features that elevate it above the competition:

- **IP65 Rating:** Full protection against water and dust – your tools stay safe, no matter the weather.
- **All-Terrain 9” Wheels:** Smooth mobility across even the roughest jobsite surfaces.
- **Half Footprint Connectivity:** More storage in less space – ideal for compact work areas and efficient stacking.
- **Durable High Impact Resin Construction:** Built to last with unbreakable materials and rugged latches.
- **Fix & Hold Technology:** The only system on the market to include integrated wall mounting brackets.
- **Internal Organisation Options:** Keep your tools and small parts sorted with multiple dividers, bins, and soft storage attachments.
- **Soft & Hard Storage Variety:** From backpacks and totes to power tool kits and crates – the system covers every storage need.

Flexibility & Value Built In

We know that one size doesn't fit all. That's why the JCB Site System offers a mix-and-match setup through our “kit builder” approach. You choose the storage that fits your workflow, whether you're on-site, in a van, or in your workshop.

And despite being packed with premium features, the Site System remains affordable – outperforming many competitors both in value and capability.

The Range at a Glance

The system includes:

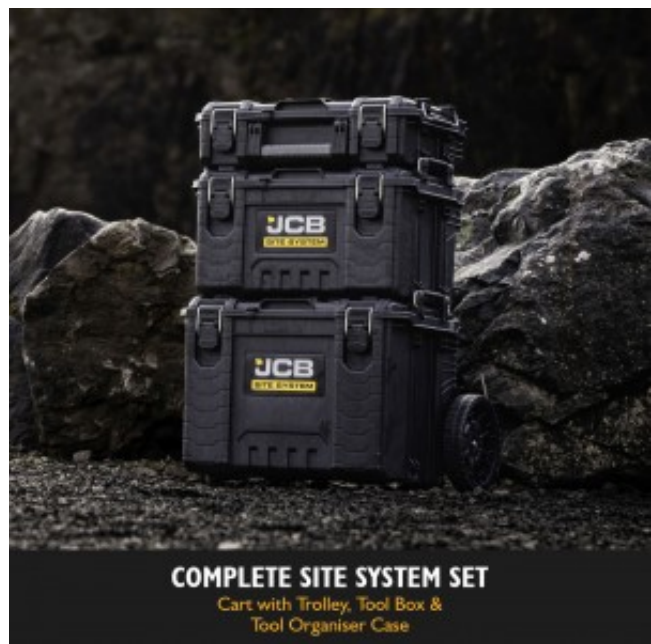

- **Carts, Toolboxes & Organisers:** Heavy-duty components with up to 113kg load capacity.
- **Power Tool Storage:** Rugged, waterproof kit bags with hard bases for jobsite durability.
- **Soft Storage:** From compact tool bags to wide-mouth totes and backpacks – every style for every trade.
- **Site Accessories:** Including 18V site radios and lights, and compact vacuums – integrating seamlessly into the tool system.

(Feature two models - [JCB-SITESYS-ST-2](#) and [JCB-SITESYS-ST](#))

With its unmatched combination of **versatility**, **durability**, and **smart design**, the JCB Site System isn't just another tool storage option – it's a new standard. Whether you're a trade professional, contractor, or serious DIYer, the Site System will keep you organised, mobile, and always ready for the job ahead.

Discover the system. Build your kit. Work smarter.
