

Schoollog Officially Launches to Simplify School Management Across India

The Jaipur based EdTech startup presents a one-stop attendance, homework, and communication channel that helps in collecting fees and school administration, which is currently being used by more than 5000 schools.

Jaipur, Rajasthan Jun 28, 2025 ([Issuewire.com](https://www.issuewire.com)) - With the main idea to revolutionize the working process of the schools across India, Schoollog, one of the emerging EdTech startups company, has finally come up with its eventful operations. Tailored according to the requirements of the Indian schools, the platform makes essential tasks of tracking attendance, setting homework and managing it,

communicating with parents, and paying fees, issuing report cards, etc. much more streamlined, with all of them within the single convenient system.

Schoollog was founded in 2015 and initially the tool was designed as a mere school communication tool but it quickly became a full-fledged School ERP software. It is currently playing host to more than 5,000 schools in the country particularly in the *Tier 2 and Tier 3 cities where the digital revolution has slowly made an impact in education.*

“The founder and CEO of Schoollog said: Our mission is to make school management easier and make good digital resources available to all schools in India, not to the ones which are not elite. We feel that technology must make teachers and school leaders more powerful and simpler to do their jobs. That is the reason why Schoollog was created.”

It provides parents, teachers, and administrators with mobile apps that enable them to make decisions faster by updating the progress and tracking students in real-time. All that is possible with catch-in-built functions such as automated SMS updates, online homework sharing, report of exams, and digital fee collection (UPI support), Schoollog wants to emerge as the key pillar of the school administration in the digital era.

Within its vision, Schoollog.in is to build and sign-up 10,000+ schools by 2026, enhance AI, and provide data-driven results to enhance learning outcomes and the performance of the schools.

About Schoollog

Schoollog is an EdTech startup in Jaipur that offers a cloud-based School Management System to the educational institutions to help them digitise their processes. The platform is simple, affordable, and scalable, which makes it accommodate schools in metros, as well as far-flung towns.
