

Scottsdale's Radiant Family Dentistry Introduces Enameloplasty for Natural Smile Enhancements

Led by Dr. Christine Chan, DDS, Radiant Family Dentistry is helping Scottsdale patients perfect their smiles with enameloplasty—a gentle, affordable cosmetic solution that enhances natural beauty without drilling, discomfort, or downtime.

Scottsdale, Arizona Jun 19, 2025 ([Issuewire.com](https://www.issuewire.com)) - Radiant Family Dentistry, a trusted name in family and cosmetic dental care, is proud to announce the addition of [enameloplasty](#) to its suite of cosmetic dental services. This subtle yet transformative procedure offers patients a non-invasive way to refine their natural teeth, improving smile symmetry and overall appearance—without the need for complex treatments.

Also known as tooth contouring or reshaping, enameloplasty involves gently smoothing minor imperfections in the enamel—such as uneven edges, slight overlaps, or small chips. The result is a more harmonious smile that still looks entirely natural. It's an ideal option for patients seeking aesthetic improvements without altering the integrity of their teeth.

“Our philosophy is centered around enhancing what patients already have,” said [Dr. Christine Chan](#), lead dentist at Radiant Family Dentistry. “Enameloplasty is a quick, conservative treatment that helps patients feel more confident in their smile, often with results visible in just one visit.”

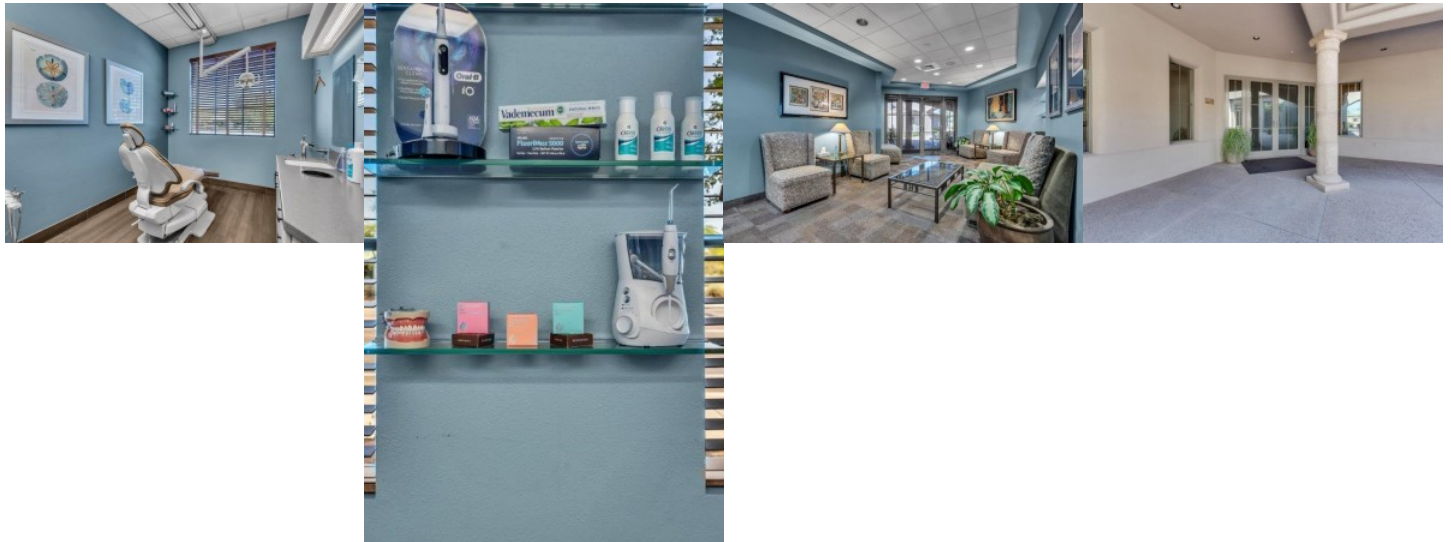

Radiant Family Dentistry has built its reputation in Scottsdale on personalized care and a focus on patient comfort. The introduction of enameloplasty reflects the practice's ongoing commitment to offering modern, minimally invasive options for patients who want to improve their smile on their own terms.

The treatment can also serve as a complement to other cosmetic or restorative procedures, such as whitening or bonding. During a consultation, the dental team will assess whether enameloplasty is the right choice based on the patient's unique goals and dental health.
