

TailwindPets Launches Innovative Custom Dog Knee Braces to Transform Pet Mobility

Compton, California Jun 1, 2025 ([Issuewire.com](https://www.issuewire.com)) - TailwindPets, a leader in canine mobility solutions, is proud to announce the nationwide availability of its premium line of custom dog knee braces. Designed for dogs recovering from injuries such as ACL tears, patellar luxation, and degenerative joint issues, Tailwind Pets' innovative braces provide non-invasive support that promotes healing and reduces pain—no surgery required.

The braces are engineered with veterinary input and biomechanics expertise to ensure optimal alignment, support, and mobility. With a secure, adjustable fit and durable materials, TailwindPets stands out by offering solutions that don't just stabilize the injured leg—but also prevent further strain on the healthy limbs.

“Most dog braces on the market focus on just one leg,” says the Product Director at Tailwind Pets. “Our design philosophy is holistic—because when one knee hurts, the whole body compensates. Our braces help protect the entire musculoskeletal system.”

According to studies published in The Veterinary Journal, up to 85% of dogs with ACL injuries show improved mobility when using orthotic support. Tailwind Pets leverages these insights to create custom braces tailored to a dog’s exact measurements, ensuring comfort and efficiency.

Key Features:

- Custom-fitted braces for optimal comfort and support
- Suitable for conditions such as torn ACLs, arthritis, and post-op recovery
- Vet-recommended and made in the USA
- Backed by a satisfaction guarantee and expert customer support

TailwindPets also offers educational resources to help pet parents make informed choices about their dogs' orthopedic needs. Their “Find a Dog Knee Brace Near Me” tool connects users with local fitting specialists and tele-vet partners across the U.S.

Dog owners seeking a non-surgical option for managing dog knee pain can explore the product range and order custom solutions at <https://tailwindpets.com>.
