

Tencent Cloud Supports GoTo in Completing Southeast Asia's Largest Cloud Migration

Jointly Advancing Innovative Digital Transformation: Tencent Cloud Supports GoTo in Completing Southeast Asia's Largest Cloud Migration

Singapore, Singapore Jun 8, 2025 ([Issuewire.com](https://www.issuewire.com)) - On June 5, Tencent Cloud and GoTo Group (hereinafter referred to as GoTo) jointly announced the successful migration of Gojek, GoTo's ride-hailing and delivery business, to Tencent Cloud.

GoTo, Indonesia's largest internet technology company, operates across three core businesses: mobility services, e-commerce platforms, and digital finance, with Gojek being one of them. Through close collaboration between Gojek and Tencent Cloud teams, over eight months of professional research and solution preparation, and leveraging more than 50 Tencent Cloud products, including CVM, CBS, WAF, TKE, and ES, the migration was completed in just 4 hours and 54 minutes, over an hour ahead of schedule.

The migration utilized cutting edge live migration technology, enabling the seamless transfer of live systems between Tencent Cloud's Data Centers and servers. It also included robust database tooling

capabilities, supporting more than 10 types of database with features such as efficient data replication, disaster recovery, and rollback, ensuring resilience and continuity at scale.

Tencent Cloud's third Indonesian data center (IDC) is now fully operational. This migration allows GoTo to comprehensively enhance its business stability and security, laying a solid and reliable digital technology foundation for its rapidly growing businesses.

Patrick Walujo, CEO of GoTo Group, said: "By working closely with Tencent Cloud to strengthen our local infrastructure, we are able to deliver a reliable experience for our users. We are grateful to Tencent Cloud for their strong support and partnership throughout this complex process."

Poshu Yeung, Senior Vice President of Tencent Cloud International, said: "We are honoured to have completed this landmark project with GoTo. By assisting GoTo in its migration, we have helped lay a solid and efficient technological foundation, enabling GoTo to seize more growth opportunities in the future."

On November 11, 2024, the China-Indonesia Business Forum was held in Beijing. In the presence of Indonesian President Prabowo Subianto, GoTo officially signed cooperation agreements with Tencent Cloud and Alibaba Cloud, pledging to deepen cooperation in cloud infrastructure, data centers, and talent development. By 2030, they will strengthen local digital infrastructure, resource integration, and related sector development in Indonesia based on local needs, with an estimated total investment of approximately US\$500 million.

In recent years, the global wave of digital development has driven rapid growth in demand for overseas cloud services. Tencent Cloud's international business has achieved sustained double-digit growth over the past three years, serving more than 10,000 enterprises across 30 industries. Today, Tencent Cloud operates in over 80 countries and regions, and is increasingly the cloud partner of choice for enterprises around the world.
