

The Golden Odyssey Launches Limited Pre-Sale of Politically Charged MemeCoins and Satirical NFTs

Palm Springs, California Jun 12, 2025 ([IssueWire.com](https://www.issuewire.com)) - The satirical mobile game project [The Golden Odyssey](#) has officially launched the **pre-sale of its MemeCoin collection and politically themed NFTs**, setting the stage for one of the most unique blends of crypto, culture, and commentary in today's digital market.

Created by **Jose Mauricio Mendoza**, co-creator of the viral Golden Trump Statue, *The Golden Odyssey* ecosystem continues to push boundaries—this time by offering **six limited-edition MemeCoins** and a collectible series of **NFTs featuring high-profile global figures**, all ready for minting and available exclusively at www.TheGoldenO.com.

The MemeCoins Collection

Available for pre-sale now and officially launching on **July 4th weekend**, the Golden Odyssey MemeCoin lineup includes:

- **Zelensky Coin**
- **Putin Coin**
- **Kim Jong Un Coin**
- **Trump Statue Coin**
- **Biden Mask Coin**
- **The Golden Trump Commemorative Coin**

Each token is more than a meme—it's a symbolic asset representing satire, politics, and financial speculation fused together.

"This is more than humor—it's art on the blockchain. These coins are our digital editorial cartoons, with real crypto upside," said Mendoza.

NFTs Mint-Ready and Now Live

In parallel, *The Golden Odyssey NFT collection* has gone live, offering a visual twist on the geopolitical landscape. From Putin under drones to Zelensky in surreal scenarios, these NFTs are:

- **Hand-crafted for collectors and crypto investors**
- **Backed by Ethereum standards**
- **Featured directly within gameplay and in upcoming promotions**

NFT holders may also receive **early access to future in-game bonuses, whitelist privileges, and airdrop perks** tied to the mobile game's launch.

Part of a Larger Ecosystem

The game, [The Golden Odyssey](#), is a political satire mobile app set to release in its final version later this year. However, its crypto elements are live now—giving the community a chance to **own the narrative** while shaping the game's world. Watch the promo trailer [here](#).

How to Participate

- Visit: www.TheGoldenO.com
- Pre-order MemeCoins (available July 4th weekend)
- Mint limited-edition NFTs (available now)
- Join the collector's community, meme economy, and crypto-political movement

About The Golden Odyssey

The Golden Odyssey is a politically satirical free prototype mobile and PC game created by Jose Mauricio Mendoza. The game features NFT and MemeCoin integrations, a playable storyline of exaggerated world politics, and unique opportunities for players and collectors to engage with digital assets while exploring parody-driven narratives.
