

# The Independent Italian Social Network for Marine Life Enthusiasts – Combining AI, Security, and Freedom

Created by a solo developer after 4 years of work, Vitamarinaweb is an innovative platform that merges artificial intelligence, advanced account protection, and full-featured social tools – 100% made in Italy.

**Roma, Lazio Jun 30, 2025 ([Issuewire.com](https://www.issuewire.com))** - In a digital world dominated by global tech giants, a new independent platform is gaining attention for its innovation, privacy-first approach, and all-in-one functionality: **Vitamarinaweb** ([www.vitamarinaweb.com](https://www.vitamarinaweb.com)).

Built entirely by a single developer over four years, Vitamarinaweb is more than just another social network – it's a **self-sustained ecosystem**, blending the features of traditional social media with the power of **integrated AI** and **multi-layered security**.

## Key features include:

- **Profile creation and post management**, with support for images, videos, likes/dislikes, and comments;
- **Private messaging and friend requests**, with real-time notifications;
- **Advanced authentication** options including fingerprint, face recognition, security keys, Google Authenticator, and full 2FA;

- **AI integration** to generate texts answers;
- **Donation system** via Stripe and PayPal;
- **Responsive design and official mobile app**, already published on Google Play;
- **Strict privacy compliance**, with a cookie banner and no invasive tracking.

#### **Additional Feature – Custom Merchandise Shop:**

As part of its expanding ecosystem, Vitamarinaweb now includes a **dedicated online shop** where users can design and order their own **custom t-shirts and gadgets** featuring their favorite **marine species** or personalized text. Whether you love dolphins, jellyfish, sharks, or seahorses, you can create unique apparel that reflects your passion for the sea and your individuality.

**“Vitamarinaweb was born to give users a secure and censorship-free space – without algorithms deciding what they can see or say,”** says the developer. “My goal was to offer a platform where users truly own their digital identity and content.”

The entire platform is **fully independent**, running on a dedicated European server, and continuously updated based on community feedback.

**Vitamarinaweb proves that one developer can build a secure, powerful, and feature-rich social platform from scratch – standing proudly among today’s tech giants.**
