

Villain Victor Debuts as Kickstarter Film Comedy Satirizing Fame

Filipp Romanychev's indie comedy launches on Kickstarter, blending satire with heartfelt storytelling.

Los Angeles, California Jun 16, 2025 ([Issuewire.com](https://www.issuewire.com)) - Villain Victor, a riotous indie comedy written and directed by Filipp Romanychev, has launched its crowdfunding campaign on Kickstarter. The film follows Victor, a down-on-his-luck actor who reluctantly plays a villain in a PR stunt and soon finds himself tangled in unexpected cons.

As modern fame becomes more elusive, Villain Victor delivers sharp satire with a deeper message. "The story reflects our shared search for validation in the chaos of modern life," says Romanychev.

The Kickstarter campaign aims to engage audiences directly in the filmmaking process. Backers can choose from rewards including a "Special Thanks" credit, exclusive behind-the-scenes access, and entry in a giveaway for Trippin' with Fibi, Romanychev's previous comedy feature. Physical collectors will appreciate the production of 2,000 high-quality 4K Blu-rays.

Villain Victor is more than just a comedy it's the first project from Romanychev's new community-powered media company, designed to champion underdog creators and foster audience collaboration. Donors can pledge starting at just \$10. The campaign closes in 24 days.

Only one link allowed per release, so backers are encouraged to support the film here:
