

VoiceVerge AI Inc Launches VoiceVerge X, Intelligent Voice Agent for Healthcare & Hospitality

VoiceVerge AI Inc, a leading innovator in conversational AI, today unveiled VoiceVerge X, an advanced voice-powered virtual agent for inbound interactions.

Dover, Delaware Jun 14, 2025 ([Issuewire.com](https://www.issuewire.com)) - [VoiceVerge AI Inc](https://www.voiceverge.ai), a leader in conversational AI, today announced the launch of VoiceVerge X, a next-generation voice-powered virtual agent designed to transform inbound interactions for healthcare and hospitality providers. VoiceVerge X brings always-on, human-sounding automation to routine calls - handling everything from room bookings and appointment scheduling to availability checks and confirmations, all without the wait or frustration of traditional systems.

"VoiceVerge X combines advanced voice AI with tailored workflows, making everyday interactions seamless for hospitals, clinics, hotels, and resorts," said Lav Mishra, CEO of VoiceVerge AI. "Whether you're confirming a doctor's visit or booking a suite, the experience feels remarkably natural."

Purpose-Built for High-Touch Industries

Hospitality Capabilities:

- Real-time room availability and pricing updates
- Seamless booking with support for dietary and service preferences
- Reservation changes, cancellations, and automated pre-arrival check-ins

Healthcare Capabilities:

- Inbound appointment scheduling and outbound reminders
- Patient info verification, including insurance and preferences
- Smart routing to nurses or administrative staff when needed

Why VoiceVerge X Stands Out

- Multilingual Voice AI: Speaks major global languages with native-level tone and accent
- Natural, Emotionally-Aware Dialogue: Understands context, expresses empathy, and handles clarifications gracefully
- Plug-and-Play Integration: Works out-of-the-box with EHRs, PMS, and CRM systems
- Live Data Sync: Connects to real-time inventories, calendars, and availability systems
- Privacy by Design: Built for HIPAA (in progress), PCI, and GDPR compliance, with local hosting options

Built on VoiceVerge's proprietary Speech-LLM platform, VoiceVerge X adapts to real-world usage, learning from interactions to handle increasingly complex requests like rescheduling post-operative follow-ups or processing special accommodation needs.

Market Impact

With the voice assistant software market projected to hit \$25 billion by 2027, VoiceVerge X is positioned to address soaring demand for automation in high-volume sectors. Healthcare and hospitality face constant pressure to reduce costs while delivering top-tier service, making intelligent voice automation a game-changer.

Availability & Pricing

VoiceVerge X is available now through VoiceVerge AI's partner network and direct engagements. Deployment options include cloud, hybrid, and private cloud models. Pilot programs start at \$10,000/month, with pricing scaled to transaction volume. Custom packages are available for regional and enterprise clients.

About VoiceVerge AI Inc.

VoiceVerge AI builds emotionally intelligent voice agents for regulated, service-focused industries. Powered by its flagship Speech-LLM platform, the company's solutions support care providers and hospitality operators around the world.
