

Wellturn Revolutionizes Invisible Dog Fences with Radar Tech

Wellturn Sets New Standard in Invisible Dog Fence Technology with Radar-Based Innovation

Australian Capital Territory, Australia Jun 29, 2025 ([Issuewire.com](https://www.issuewire.com)) - As the demand for smart pet containment solutions continues to rise globally, **Shenzhen Wellturn Technology Co., Ltd.**, a leading high-tech enterprise in the pet electronics industry, is redefining the future of **invisible dog fence** technology through advanced radar-based systems and customized OEM/ODM services.

Founded in 2013, **Wellturn** specializes in the R&D, production, sales, and service of smart pet

products. With a strong emphasis on **electric dog fences**, pet training systems, and other intelligent pet lifestyle solutions, the company has built a solid reputation backed by over a decade of industry experience, innovation-driven growth, and superior product quality.

“Wellturn aims to become the global leader in the electronic dog fence industry within the next two years,” the company stated. “Our investment in radar-based positioning sets a new benchmark for accuracy and reliability in invisible pet fencing.”

Radar-Based Breakthrough: Setting a New Benchmark

The company’s latest radar-positioning innovation addresses long-standing limitations in traditional invisible fences. Unlike GPS-based models, radar systems developed by Wellturn offer **precise boundary detection**, **real-time feedback**, and **obstacle-free performance**, all without the need for buried wires, SIM cards, or apps.

This cutting-edge technology is already embedded in Wellturn’s flagship models—the **F900** and **F910** series—setting a new industry milestone for **portable electric fences** and smart **pet electric fence** solutions.
