What Makes Constellations Unique?

Constellations are a powerful modality that goes beyond classical talk therapy. They work on a deep

energetic level, addressing not only personal struggles but also inherited family patterns, subconscious blocks, and karmic influences.

This practice is especially effective in releasing:

- Emotional pain and patterns in love and relationships
- Blocked financial flow and limiting beliefs around money
- Health issues connected to emotional or ancestral roots
- Generational traumas and unresolved family dynamics

Simply participating — whether as a client or a representative — can shift your internal system and bring immediate clarity.
