

Advaa Health Unveils Integrated Practice Management Software for Direct Primary Care Clinics

Advaa Health launches an all-in-one Practice Management Software for Direct Primary Care clinics—featuring AI notes, eRx, lab integration, and revenue tracking to streamline operations, reduce admin time, and enhance patient care.

New York City, New York Jul 28, 2025 ([Issuewire.com](https://www.issuewire.com)) - Advaa Health, a leading technology provider for [Direct Primary Care](#) (DPC), today announced the release of its fully integrated Practice Management Software—a comprehensive, physician-first platform built to streamline operations,

improve patient care, and drive sustainable growth for DPC practices.

Designed with real-world clinic needs in mind, the software brings together every essential tool—from AI-powered note-taking and electronic prescriptions to lab integrations and revenue tracking—into a seamless, easy-to-use interface.

Solving the Fragmentation Problem in DPC

DPC practices are often forced to piece together multiple tools not built for their care model. Advaa Health solves that with a unified system that eliminates redundant clicks, improves clinical efficiency, and enhances the patient experience.

“Independent physicians need more than a generic EHR. They need a system that works the way they do,” said Deepak Sharma, CEO of Advaa Health. “This software reflects our belief that technology should simplify—not complicate—direct care delivery.”

Key Features of the Advaa Platform

Advaa Health’s Practice Management Software includes nine fully integrated modules that support every aspect of a DPC clinic:

1. Practice Growth Tools

Drive patient acquisition, optimize scheduling, and build lasting patient relationships.

2. Electronic Prescriptions

Quickly and securely prescribe medications from within the platform.

3. Patient 360 Health View

Access vitals, history, labs, assessments, and care plans—all in one screen.

4. Digital Front Office

Automate onboarding, scheduling, and documentation intake.

5. Electronic Lab Orders

Order, track, and receive lab results directly through the system.

6. Patient Portal

Enable patients to message, view records, and complete forms digitally.

7. Voice AI Notes

Dictate SOAP notes in natural speech and watch them auto-structured instantly.

8. Integrated Communication

Secure messaging, video, and chat tools keep care teams and patients connected.

9. Revenue Cycle Management

Track payments, memberships, and hybrid billing to maintain strong cash flow.

Designed for DPC, Supported by Advaa

Built from the ground up for Direct Primary Care clinics, the platform reduces screen time and administrative overhead so physicians can focus on what matters most—patient care.

Advaa's dedicated support team ensures easy onboarding and fast customization for every clinic.
